COURSE TITLE	AUDITING									
INDEPENDENT TEACHING ACTIVITIES if credits are awarded for separate components of the course, e.g. lectures, laboratory exercises, etc. If the credits are awarded for the whole of the course, give the weekly teaching hours and the total credits			TEACHING HOURS PER WEEK		ECTS CREDITS					
Lectures			3		5					
Add rows if necessary. The organisation of teaching and the teaching methods used are described in detail at (d).										
COURSE TYPE <i>general background, special background, specialised general knowledge, skills development</i>	Field of science									
PREREQUISITE COURSES:	There are no Prerequisite Courses: the students should possess knowledge on Financial Accounting I & II									
TEACHING AND ASSESSMENT LANGUAGE:	Greek									
THE COURSE IS OFFERED TO ERASMUS STUDENTS										
COURSE WEBPAGE (URL)	https://eclass.upatras.gr/courses									

1. LEARNING OUTCOMES

<p>Lerning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> ● <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> ● <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> ● <i>Guidelines for writing Learning Outcomes</i> <p>The course provides students with the whole framework as regards the following scientific areas:</p> <ol style="list-style-type: none"> 1. Audit context and regulatory mechanisms 2. Planning and risk evaluation
--

3. Internal control: audit procedures and methodology

4. Final audit evaluation and reporting

More specifically:

1. Audit context and regulatory mechanisms

The course describes the general concept of audit framework. In particular, it presents the internal control systems, the external audit process, corporate governance issues, and several professional ethics in the new business environment.

2. Planning and risk evaluation

The course also introduces the students to all the important tools of assessing several audit risks. From this point of view, a main aim of the course is to present the entity and its internal environment. Further, the contents of audit strategy and planning are investigated and discussed.

3. Internal control: audit procedures and methodology

In this section, the elements and the characteristics of internal control are presented related to the sales, inventory, cash, and non-current assets system.

4. Final audit evaluation and reporting

The specific section describes the procedures that auditors should follow to conduct an overall review of financial statements along with the basic elements contained in the independent auditor's report.

At the end of the course the student will have further developed *inter alia* the following **skills/competences**:

- Auditing of financial statements
- Recognition of risks and frauds,
- Internal control mechanisms,
- Final reporting.

At the end of this course **the student should be able to**:

1. understand the auditing environment,
2. explain the content of the independent auditors' report,
3. assess audit risks,

4. formulate final audit reports.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

COURSE TYPE Υποβάθρου, Γενικών Γνώσεων, Επιστημονικής Περιοχής, Ανάπτυξης Δεξιοτήτων	Field of Science										
PREREQUISITE COURSES:	It is desirable – but not necessary – that students have previously completed the courses “Introduction to Marketing”, “Introduction to Tourism” and “Hotel Management”.										
TEACHING AND ASSESSMENT LANGUAGE:	English										

THE COURSE IS OFFERED TO ERASMUS STUDENTS	Yes
COURSE WEBPAGE (URL)	

1. LEARNING OUTCOMES

Learning outcomes

Περιγράφονται τα μαθησιακά αποτελέσματα του μαθήματος οι συγκεκριμένες γνώσεις, δεξιότητες και ικανότητες καταλλήλου επιπέδου που θα αποκτήσουν οι φοιτητές μετά την επιτυχή ολοκλήρωση του μαθήματος.

Συμβουλευτείτε το Παράρτημα Α (ξεχωριστό αρχείο στο e-mail)

- Περιγραφή του Επιπέδου των Μαθησιακών Αποτελεσμάτων για κάθε ένα κύκλο σπουδών σύμφωνα με Πλαίσιο Προσόντων του Ευρωπαϊκού Χώρου Ανώτατης Εκπαίδευσης
- Περιγραφικοί Δείκτες Επιπέδων 6, 7 & 8 του Ευρωπαϊκού Πλαισίου Προσόντων Διά Βίου Μάθησης και Παράρτημα Β
- Περιληπτικός Οδηγός συγγραφής Μαθησιακών Αποτελεσμάτων

The course aims at better understanding the key challenges being faced by both hotel companies and destination marketing organizations (DMOs) and the managerial solutions they employ to thrive within the current market conditions.

By the end of this course, students will be able to:

1. determine and analyze the operational and entrepreneurial characteristic of a hotel,
2. handle key aspects of business planning for a hotel,
3. understand the importance and the way tourism organizations operate,
4. comprehend the role of DMOs in tourism planning and in promoting tourism development in a destination,
5. know key principles of managing such organizations.

General Abilities

Λαμβάνοντας υπόψη τις γενικές ικανότητες που πρέπει να έχει αποκτήσει ο πτυχιούχος (όπως αυτές αναγράφονται στο Παράρτημα Διπλώματος και παρατίθενται ακολούθως) σε ποια / ποιες από αυτές αποσκοπεί το μάθημα;

Αναζήτηση, ανάλυση και σύνθεση δεδομένων και πληροφοριών, με τη χρήση και των απαραίτητων τεχνολογιών

Προσαρμογή σε νέες καταστάσεις

Λήψη αποφάσεων

Αυτόνομη εργασία

Ομαδική εργασία

Εργασία σε διεθνές περιβάλλον

Εργασία σε διεπιστημονικό περιβάλλον

Παράγωγή νέων ερευνητικών ιδεών

Σχεδιασμός και διαχείριση έργων

Σεβασμός στη διαφορετικότητα και στην πολυπολιτισμικότητα

Σεβασμός στο φυσικό περιβάλλον

Επίδειξη κοινωνικής, επαγγελματικής και ηθικής υπευθυνότητας και ευαισθησίας σε θέματα φύλου

Άσκηση κριτικής και αυτοκριτικής

Προαγωγή της ελεύθερης, δημιουργικής και επαγωγικής σκέψης

At the end of the course the student will have further developed the following skills/competences:

1. understanding of the economic impact of the hotel sector,
2. ability of analyzing key hotel business data,
3. managerial skills applicable at hotels,
4. key principles of tourism planning from a DMO's perspective,
5. ability of evaluating a tourism campaign.

Generally, by the end of this course the student will, furthermore, have develop the following general abilities (from the list above):

- *Searching, analysis and synthesis of facts and information, as well as using the necessary technologies*
- *Adaptation to new situations*
- *Decision making*

- *Respect for difference and multiculturalism*
- *Exercise of criticism and self-criticism*
- *Promotion of free, creative and inductive thinking*

2. COURSE CONTENT

Part I: Destination marketing and DMO management

5. About DMOs (destination marketing organisations)
6. The destination marketing task
7. Strategic marketing planning
8. Destination branding
9. Producing high-quality content
10. Online marketing
11. DMO case studies:
 - Wonderful Copenhagen
12. Destination marketing case studies:
 - Palau
 - The Faroe Islands
 - Naxos

Part II: Hotel management

13. About Hotels
14. Hotel Distribution and Direct Bookings
15. Hotel Branding
16. Hotel Design
17. Case studies:
 - Hilton (direct bookings)
 - Paradise Island Villas (gaining independence from tour operators)
 - Liostasi los Hotel & Spa (boutique hotel)
 - Tru by Hilton (design)

3. TEACHING AND LEARNING METHODS - ASSESSMENT

TEACHING METHOD <i>Πρόσωπο με πρόσωπο, Εξ αποστάσεως εκπαίδευση κ.λπ.</i>	Face to face	x

1. LEARNING OUTCOMES

<p>Lerning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i> <p>Developments in the financial system and the money and capital markets provide new growth opportunities, but also create new challenges that require appropriate analysis. The main objective of this course is to learn about the theories and applications associated with the functions of money and capital markets. At the end of this course the students should be able to:</p> <ul style="list-style-type: none"> • Understand the role of the financial system • Understand the money market. • Understand the currency market. • Understand the capital market.

- Use the appropriate tools and the most suitable techniques for pricing financial products, evaluate their risk and return.

In addition, exercises are solved so that the students gain essential skills and more flexibility in dealing with practical problems in the field of financial and capital markets.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	
Adapting to new situations	
Decision-making	
Working independently	
Team work	
Working in an international environment	
Working in an interdisciplinary environment	
Production of new research ideas	
Project planning and management	
Respect for difference and multiculturalism	
Respect for the natural environment	
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	
Production of free, creative and inductive thinking	

By the end of this course the student will, furthermore, have developed the following skills (general abilities):

- Searching, analysis and synthesis of facts and information, as well as using the necessary technologies
- Decision making
- Autonomous (Independent) work
- Work design and project management
- Promotion of free, creative and inductive thinking

2. COURSE CONTENT

- The role of financial system
- Present Value and Compounding
- Foreign exchange market (Spot, Forward, Swap, etc.),
- Money market (Time deposits, Commercial papers, Federal funds, Repos, Repurchase agreements, Forward rate agreements, etc.),

- Bond market (Corporate bonds, Structured Bonds, Municipal bonds, etc.)
- Derivative markets (Forward contracts, Futures contracts, Options contracts, etc.)
- Apply appropriate pricing techniques for financial products.
- Evaluate the risk and return of financial products.
- Portfolio theory, Security analysis, Models of equilibrium in the capital markets

3. TEACHING AND LEARNING METHODS - ASSESSMENT

SPECIAL ISSUES OF FINANCIAL MANAGEMENT

COURSE OUTLINE

School of Economics and Business	SCHOOL OF ECONOMICS AND BUSINESS		
DEPARTMENT	BUSINESS ADMINISTRATION		
LEVEL OF COURSE	UNDERGRADUATE		
COURSE CODE	BA_311	SEMESTER OF STUDIES	5 th and 7 th
COURSE TITLE	SPECIAL ISSUES OF FINANCIAL MANAGEMENT		
INDEPENDENT TEACHING ACTIVITIES σε περίπτωση που οι πιστωτικές μονάδες απονέμονται σε διακριτά μέρη του μαθήματος π.χ. Διαλέξεις, Εργαστηριακές Ασκήσεις κ.λπ. Αν οι πιστωτικές μονάδες απονέμονται ενιαία για το σύνολο του μαθήματος αναγράψτε τις εβδομαδιαίες ώρες διδασκαλίας και το σύνολο των πιστωτικών μονάδων	TEACHING HOURS PER WEEK	ECTS CREDITS	
Lectures and laboratory work	3 (lectures)	5	
<i>Προσθέστε σειρές αν χρειαστεί. Η οργάνωση διδασκαλίας και οι διδακτικές μέθοδοι που χρησιμοποιούνται περιγράφονται αναλυτικά στο 4.</i>			
COURSE TYPE Υποβάθρου , Γενικών Γνώσεων, Επιστημονικής Περιοχής, Ανάπτυξης Δεξιοτήτων	Field of Science and Skills Development		
PREREQUISITE COURSES:	No prerequisite courses. It is recommended basic knowledge of Financial Management, Statistics and Economics.		
TEACHING AND ASSESSMENT LANGUAGE:	Greek.		
THE COURSE IS OFFERED TO ERASMUS STUDENTS	NO		
COURSE WEBPAGE (URL)	https://eclass.upatras.gr/courses/BMA731/		

5. LEARNING OUTCOMES

<p>Lerning outcomes</p> <p>Περιγράφονται τα μαθησιακά αποτελέσματα του μαθήματος οι συγκεκριμένες γνώσεις, δεξιότητες και ικανότητες καταλλήλου επιπέδου που θα αποκτήσουν οι φοιτητές μετά την επιτυχή ολοκλήρωση του μαθήματος.</p> <p>Συμβουλευτείτε το Παράρτημα Α (ξεχωριστό αρχείο στο e-mail)</p> <ul style="list-style-type: none"> Περιγραφή του Επιπέδου των Μαθησιακών Αποτελεσμάτων για κάθε ένα κύκλο σπουδών σύμφωνα με Πλαίσιο Προσόντων του Ευρωπαϊκού Χώρου Ανώτατης Εκπαίδευσης Περιγραφικοί Δείκτες Επιπέδων 6, 7 & 8 του Ευρωπαϊκού Πλαισίου Προσόντων Διά Βίου Μάθησης και Παράρτημα Β Περιληπτικός Οδηγός συγγραφής Μαθησιακών Αποτελεσμάτων <p>Making investments with a high rate of efficiency requires rational decision making and evaluation of investment projects. Specifically, the course aims to teach students techniques and methods of Financial Management and Investment Appraisal to apply them in practice.</p> <p>At the end of this course the students should be able to:</p>
--

- Understand the meaning of Net Cash Flow readjustment
- Assess risk and return on investment projects under uncertainty
- Evaluate investments in fixed assets under uncertainty.
- Evaluate investments under inflation conditions
- Analyze the Break-Even Point
- Assess Working Capital
- Evaluate the performance of mutual funds

The objective of the course is to deepen in financial issues that are not analysed in the compulsory course of Financial Management through the elaboration of case studies and the solution of specific exercises-problems, so that students gain essential skills and more flexibility in dealing with practical problems of investment evaluation.

General Abilities

Λαμβάνοντας υπόψη τις γενικές ικανότητες που πρέπει να έχει αποκτήσει ο πτυχιούχος (όπως αυτές αναγράφονται στο Παράρτημα Διπλώματος και παρατίθενται ακολούθως) σε ποια / ποιες από αυτές αποσκοπεί το μάθημα:

Αναζήτηση, ανάλυση και σύνθεση δεδομένων και πληροφοριών, με τη χρήση και των απαραίτητων τεχνολογιών

Προσαρμογή σε νέες καταστάσεις

Λήψη αποφάσεων

Αυτόνομη εργασία

Ομαδική εργασία

Εργασία σε διεθνές περιβάλλον

Εργασία σε διεπιστημονικό περιβάλλον

Παράγωγή νέων ερευνητικών ιδεών

Σχεδιασμός και διαχείριση έργων

Σεβασμός στη διαφορετικότητα και στην πολυπολιτισμικότητα

Σεβασμός στο φυσικό περιβάλλον

Επίδειξη κοινωνικής, επαγγελματικής και ηθικής υπευθυνότητας και ευαισθησίας σε θέματα φύλου

Άσκηση κριτικής και αυτοκριτικής

Προαγωγή της ελεύθερης, δημιουργικής και επαγωγικής σκέψης

By the end of this course the student will, furthermore, have developed the following skills (general abilities):

- Searching, analysis and synthesis of facts and information, as well as using the necessary technologies
- Decision making
- Autonomous (Independent) work
- Work design and project management
- Promotion of free, creative and inductive thinking

6. COURSE CONTENT

1. Risk and Uncertainty
2. Revaluation of Cash Flows in accordance with Income Taxes
3. Evaluation of investments in fixed assets under uncertainty
4. Evaluation of investments under inflation conditions
5. Break-even analysis
6. Operating and cash leverage
7. Working Capital Management
8. Mutual fund evaluation
9. Risk-adjusted Performance Measures
10. Market timing and selectivity of fund managers

7. TEACHING AND LEARNING METHODS - ASSESSMENT

1. LEARNING OUTCOMES

<p>Lerning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i> <p>This is an introductory course to the sports industry for undergraduate students. It explores the different settings for sports as well as the size and characteristics of the local and international industry related to professional and amateur sports. It also differentiates the types of sport programs offered in the private, public and nonprofit sector, including sports tourism. The aim of this course is that students have the opportunity (1) to apply already developed management and marketing knowledge and tools in sports organizations and businesses (2) to understand in more depth the consumer behavior pertinent to sports services, programs and spectator sports and (3) to develop critical thinking skills</p>

to solve problem in sport organizations. Given the power of sport as a social institution, sport managers of the future need to be agents of change, at the local or national level.

At the end of this course the student should be able to:

- Explain the unique aspects of sport and sports management and identify the different types of settings in which sporting activities are delivered.
- Differentiate between types of sport behavior and understand the process of decision making in sport.
- Identify the unique facets of professional sport including its governance and sources of revenues.
- Apply management and marketing knowledge and theories in different type of sports organizations.
- Demonstrate an understanding of the principles and procedures in planning and staging sport events and facilities.
- Understand the interaction between sport and tourism and the socio-economic implications of sport tourism.

At the end of the course the student will have further developed the following skills/competences:

- To address managerial problems and challenges in sports organizations.
- To design and put in place sports related services, programs and events.
- To design and implement marketing and sponsorship programs in the sport sector.
- To evaluate sport services and identify sports-related needs in the broad area of sports.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>
<i>Production of new research ideas</i>	<i>Others...</i>

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of the course is to present inter alia the strategies and the processes of business restructuring.

In this framework, the lifecycle of industries and companies, the consolidation strategies of non-profitable firms, the business strategies under crisis conditions, the mergers & acquisitions, and the firm adjustment to external and internal conditions will be discussed.

At the end of the course the student will have further developed the following skills/competences:

1. Change management,
2. Crisis management,
3. Human resource management in turbulent environments,
4. Management of mergers & acquisitions,
5. Consolidation of firm groups.

At the end of this course the student should be able to:

1. understand the need for change,
2. effectively manage the human factor in the dynamic context,
3. apply the tool of mergers & acquisitions.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>

1. LEARNING OUTCOMES

<p>Leraning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i>
<p>The course provides students with the whole framework as regards the following scientific areas:</p> <p>5. The conceptual and regulatory framework for the preparation of financial statements</p> <p>6. The analysis, the evaluation, and the interpretation of financial statements</p> <p>More specifically:</p>

1. The conceptual and regulatory framework for the preparation of financial statements

The course describes the general concept of the preparation of financial statements. Moreover, it illustrates the characteristics of accounting information related to the recognition and measurement of diverse accounts of assets, liabilities, income, and expenses. Also, the computation of amounts concerning the above accounting variables through the historical cost and fair value measures are analyzed and interpreted.

In addition, a comparative analysis of IFRS and the New Greek Accounting Standards (valid from the beginning of 2015) takes place revealing their advantages and disadvantages.

Finally, the analysis is undertaken at two levels:

- first, at the level of single entity, and
- second, at the level of business groups.

2. The analysis, the evaluation, and the interpretation of financial statements

The course also introduces the students to all the important tools and methods of analyzing and evaluating the accounting statements.

In this context, the central aim of the course is to present the analysis of financial statements based on financial ratios. In particular, students will be introduced into the methodology and the different groups of financial ratios such as liquidity ratios, activity ratios, profitability ratios, financial structure ratios, and investment ratios. In addition, issues such as vertical analysis, horizontal analysis, working capital, and cash flows are discussed. In this way, the main financial strengths and weaknesses of businesses can be detected thus effectively addressing users and stakeholders' needs.

Furthermore, many case studies stemmed from different industries and sectors are discussed and evaluated. More precisely, the analysis covers several firms of different business size (micro, small, medium, large), diverse product categories (agriculture, manufacturing, services), and different strategic orientation (private, public, non profit organizations, mixed-ownership entity).

At the end of the course the student will have further developed *inter alia* the following **skills/competences**:

- Initial measurement and later recognition of amounts of assets
- Calculation of financial ratios,
- Evaluation of their results,
- Formulation of proposals to solve financial problems of the enterprise and its industry.

At the end of this course **the student should be able to:**

1. understand the usefulness of financial statements of single entities and business groups,

2. analyze their financial statements, especially the statement of financial position, the statement of profit or loss, the statement of changes in equity, and the statement of cash flows,
3. identify the financial advantages and disadvantages of firms of diverse business size stemmed from different economic sectors, industries, and product categories, with a divergent strategic philosophy reflected in a differentiated vision and mission (Corporate Social Responsibility, Corporate Governance, Sustainable Development, Agency Theory, stakeholder Approach)
4. evaluates and compares with accounting and financial criteria different firms, and production sectors within a national economy.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>
<i>Production of new research ideas</i>	<i>Others...</i>

2. COURSE CONTENT

- Introduction
- Framework of financial reporting: IFRS, New Greek Accounting Standards, historical evolution of Accounting Standards in the local economy,
- Basic concepts and general perspective of accounting analysis: recognition and measurement notions, structure of the main financial statements,
- Concepts and principles of groups of interest: stakeholder groups such as investors, shareholders, suppliers, clients, banks, government bodies, local society,
- Initial measurement and recognition of specific assets: tangible non-current assets, intangible non-current assets, impairment of assets, inventory, financial instruments, provisions, leasing, recognition of revenues and expenses
- Preparation of financial statements of single entities and business groups: the statement of financial position, the statement of profit or loss, the statement of changes in equity, and the statement of cash flows using the indirect method
- Methods of analysis: horizontal analysis and vertical analysis, static and dynamic analysis, single industry and multi-sector analysis
- Accounting ratios: liquidity ratios, activity ratios, profitability ratios, financial structure ratios, investment ratios (e.g., earnings per share, p/e)
- Working capital
- Break even point analysis

1. LEARNING OUTCOMES

Lerning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

This course aims to analyze the industrial marketing process, as well as to present the role of sales, within the broader context of industrial marketing.

In particular, by the end of this course students are expected to have knowledge and understanding of:

1. Industrial markets
2. The organizational buying decision process

3. The development of industrial marketing strategy
4. The particular characteristics and importance of industrial marketing mix variables (distribution, communications, products and pricing)
5. The current trends in industrial marketing (e.g. technological developments, ethical dimension and systemic approach)
6. The purchase and decision criteria of large / important customers (i.e. key accounts)
7. The role and contribution of the sales function to the company, in the context of marketing activities
8. The predominant sales management strategies and tactics

General Abilities

<p>Lerning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i>
<p>The theoretical approaches to the state's economic functions in modern capitalist formations differ: The first generation of Neoclassical economists (1870-1920) argued that the private enterprise driven by the price mechanism in a competitive market can maximize society's economic prosperity, provided that the state does not interfere in the functioning of the market. The revised position of the Neoclassical School, which was delivered later (1930 onwards), argued that, in order for economic welfare maximization to be achieved, the combined economic activity of both private enterprise and the state is needed. Marxists believe that economic and ideological functions of the state aim at the cohesion and unity of the capitalist social formation, so that the reproduction of relations of exploitation can be ensured. The assumptions and the analysis of the above theories regarding the economic functions of the state are the object of the course of Public Economics.</p> <p>At the end of the course students will be able to know be aware of conflicting theoretical approaches regarding questions such as:</p> <ol style="list-style-type: none"> 1. The goals of state economic activity. 2. The tools of state economic intervention. 3. The criteria and the process of state economic action.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The main objective of the course is to provide students with the knowledge, insight and skills necessary to manage, lead and develop people effectively within an organizational context. The course identifies the factors and forces that managers confront and helps students develop an understanding of the nature of decision-making involved in Human Resources Management. Emphasis will be given to HRM practices in organizations, planning human resources, recruitment and selection, talent management, training and development, the scope and structure of compensation systems and performance appraisal.

Upon successful completion of this course students should be able to:

- Critically analyze the strategic importance of human resource management and the role of today's human resource manager by the use of theoretical models and case study analysis.
- Explain key techniques in the application of human resource management.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The purpose of the course is to introduce the student to the concepts of risk and return, risk diversification, and the selection and evaluation of effective portfolios. We will be given the theoretical support of modern portfolio theory

The course combines knowledge gained from the International Money and Capital Markets, Business Statistics, Micro-Economics I and Financial Econometrics.

At the end of the semester the student will be able to:

- Know and calculate return and risk (various sizes).
- Build an effective portfolio boundary.
- Evaluate portfolios
- To calculate risk and return on internationally diversified portfolios.
- To comment on the current problems of the globalized money and capital market with its impact on portfolio diversification.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<p>Lerning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i> <p>The main objective of this course is to present and analyze the key components of international business in the context of the increasing internationalization of economic activities, as well as the effects of cultural values on administrative functions. Furthermore, through this course an investigation of the contemporary theories and practices of intercultural management and international human resource management occurs.</p>
--

Additionally, due to the multidimensional and interdisciplinary character of the teaching subject, emphasis was given on the analysis of the main parameters of the management of cultural differences and the range of practical measures required to effectively run a business in an international environment.

At the end of this course students will be able to:

1. Understand and interpret critically the effects of cultural values on administrative functions and practices of international human resource management.
2. Gain the knowledge and skills required for an effective manager in an international business environment.
3. Develop ideas and arguments about contemporary problems of intercultural management and international human resource management.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

9. LEARNING OUTCOMES

Learning outcomes

Περιγράφονται τα μαθησιακά αποτελέσματα του μαθήματος οι συγκεκριμένες γνώσεις, δεξιότητες και ικανότητες καταλλήλου επιπέδου που θα αποκτήσουν οι φοιτητές μετά την επιτυχή ολοκλήρωση του μαθήματος.

Συμβουλευτείτε το Παράρτημα Α (ξεχωριστό αρχείο στο e-mail)

- Περιγραφή του Επιπέδου των Μαθησιακών Αποτελεσμάτων για κάθε ένα κύκλο σπουδών σύμφωνα με Πλαίσιο Προσόντων του Ευρωπαϊκού Χώρου Ανώτατης Εκπαίδευσης
- Περιγραφικοί Δείκτες Επιπέδων 6, 7 & 8 του Ευρωπαϊκού Πλαισίου Προσόντων Διά Βίου Μάθησης και Παράρτημα Β
- Περιληπτικός Οδηγός συγγραφής Μαθησιακών Αποτελεσμάτων

The aim of the course is to analyze internationalization strategies and entry modes in foreign markets. It presents a comprehensive view of global expansion for firms, as well as the prerequisites for their success under the light of a dynamic environment and need for constant change.

At the end of this course the student should be able to:

1. Recognize the ownership-specific advantages that guarantee successful entry into foreign markets and company growth.
2. Understand and evaluate the type of foreign direct investment (FDI) of a firm.
3. Explain the reasons - incentives of internationalization.
4. Comprehend the several entry modes and evaluate their advantages and disadvantages.
5. Recognize the different roles of subsidiaries.
6. Understand the positive impact of FDI for home and host countries.

General Abilities

Λαμβάνοντας υπόψη τις γενικές ικανότητες που πρέπει να έχει αποκτήσει ο πτυχιούχος (όπως αυτές αναγράφονται στο Παράρτημα Διπλώματος και παρατίθενται ακολούθως) σε ποια / ποιες από αυτές αποσκοπεί το μάθημα:

Αναζήτηση, ανάλυση και σύνθεση δεδομένων και πληροφοριών, με τη χρήση και των απαραίτητων τεχνολογιών

Προσαρμογή σε νέες καταστάσεις

Λήψη αποφάσεων

Αυτόνομη εργασία

Ομαδική εργασία

Εργασία σε διεθνές περιβάλλον

Εργασία σε διεπιστημονικό περιβάλλον

Παράγωγή νέων ερευνητικών ιδεών

Σχεδιασμός και διαχείριση έργων

Σεβασμός στη διαφορετικότητα και στην πολυπολιτισμικότητα

Σεβασμός στο φυσικό περιβάλλον

Επίδειξη κοινωνικής, επαγγελματικής και ηθικής υπευθυνότητας και ευαισθησίας σε

θέματα φύλου

Άσκηση κριτικής και αυτοκριτικής

Προαγωγή της ελεύθερης, δημιουργικής και επαγωγικής σκέψης

At the end of the course the student will have further developed the following skills/competences:

1. To critically face internationalization issues presented through up-to-date case studies from the Greek and global arena.
2. To suggest new internationalization moves and strategies for companies based on analyzing their competencies and the global environment developments.

Generally, by the end of this course the student will, furthermore, have develop the following general abilities (from the list above):

Searching, analysis and synthesis of facts and information, as well as using the necessary technologies

Adaptation to new situations

Decision making

Autonomous (Independent) work

Promotion of free, creative and inductive thinking

Respect to natural environment

Respect to differentiation and multiculturalism

Work in international environment

Social and ethical responsibility in gender issues

10. COURSE CONTENT

1. Internationalization - basic concepts.
2. Global environment.
3. Entry modes in foreign markets.

4. FDI incentives.
5. Greenfield starts, mergers and acquisitions, strategic alliances.
6. Subsidiary roles.
7. FDI impact on home and host countries.

11. TEACHING AND LEARNING METHODS - ASSESSMENT

<p>TEACHING METHOD Πρόσωπο με πρόσωπο, Εξ αποστάσεως εκπαίδευση κ.λπ.</p>	Lectures

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

Business Law is fundamental in creating reliable standarts for companies to follow. This course provides students with fundamental elements of company law, by focusing on the following topics of SA companies and limited liability companies: basic principles of company law, separate legal personality, formation – registration- articles of association, Board of directors, appointment and removal of members of Board of directors, directors duties and liability, share issues- share capital- shareholders, resolutions and meetings, termination of company. The course also

presents basic regulation on negotiable instruments as payment systems (banking cheques – bills of exchange), and an introduction to competition law and unfair business practices law .

By the end of this course the student will have acquired the skill to apprehend :

1. Statutory distinctions of companies
2. The economic and legal environment of S.A companies
3. The legal specificities of limited liability companies
4. The legal rules of operation of bank cheques and bills of exchange
5. Main issues of competition law and business unfair practices law.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	
Adapting to new situations	
Decision-making	
Working independently

PRODUCTION AND SUPPLY CHAIN MANAGEMENT - LOGISTICS

COURSE OUTLINE

SCHOOL	SCHOOL OF ECONOMICS AND BUSINESS									
DEPARTMENT	BUSINESS ADMINISTRATION									
LEVEL OF COURSE	UNDERGRADUATE									
COURSE CODE	BA_133	SEMESTER OF STUDIES	1 st	2 nd	3 rd	4 th	5 th	6 th	7 th	8 th
									X	
COURSE TITLE	PRODUCTION AND SUPPLY CHAIN MANAGEMENT - LOGISTICS									
INDEPENDENT TEACHING ACTIVITIES if credits are awarded for separate components of the course, e.g. lectures, laboratory exercises, etc. If the credits are awarded for the whole of the course, give the weekly teaching hours and the total credits			TEACHING HOURS PER WEEK		ECTS CREDITS					
Lectures			3		5					
<i>Add rows if necessary. The organisation of teaching and the teaching methods used are described in detail at (d).</i>										
COURSE TYPE <i>general background, special background, specialised general knowledge, skills development</i>	Field of science									
PREREQUISITE COURSES:	There are no Prerequisite Courses: It is recommended that students have at least a basic knowledge of Differential and Integral Calculus as well as Statistics.									
TEACHING AND ASSESSMENT LANGUAGE:	Greek									
THE COURSE IS OFFERED TO ERASMUS STUDENTS										
COURSE WEBPAGE (URL)	https://eclass.upatras.gr/courses/BMA422/									

1. LEARNING OUTCOMES

<p>Lerning outcomes The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</p> <p>Consult Appendix A</p> <ul style="list-style-type: none"> • Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area • Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B • Guidelines for writing Learning Outcomes
<p>By the end of this course the student will be able to:</p> <p>1. Explain the strategic importance of the supply chain.</p>

2. Understand the main factors to be considered in the design of a distribution network.
3. Solve facility location and capacity allocation problems using known techniques,
4. Use known methods for solving routing and scheduling delivery problems in transportation networks.
5. Explain and use the basic inventory models for independent demand.
6. Recognize the role of aggregate planning in supply chain and identify optional strategies for aggregate production planning.
7. Understand the role and logic of operation of MRP systems for inventory depended demand.
8. Identify the basic approaches for short-term production scheduling in flow-shop systems.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	x
Adapting to new situations	x
Decision-making	x
Working independently	x
Team work	x
Working in an international environment	
Working in an interdisciplinary environment	
Production of new research ideas	
Project planning and management	x
Respect for difference and multiculturalism	
Respect for the natural environment	x
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	x
Production of free, creative and inductive thinking	x

Others:By the end of this course the student will, furthermore, have developed the following skills (general abilities):
 Solve facility location and capacity allocation problems in delivery networks.
 Compute shortest and distance shortest routes between depot and destination in delivery networks.

Solve routing and scheduling deliveries for a fleet of vehicles in transportation networks.
 Apply basic methods for controlling inventory for both independent and depended demand.
 Use priority rules for sequencing customers' orders in flow-shop production systems.

2. COURSE CONTENT

1. Understanding the supply chain (business logistics).
2. Supply chain processes and delivery networks
3. Network design in supply chains.
4. Facility location and capacity allocation decisions in delivery networks.
5. Transportation decisions in supply chains: shortest distance problems, vehicles routing and scheduling problems
6. Inventory decisions in supply chains: inventory models for independent demand.
7. Materials requirement systems (MRP): inventory models for depended demand.
8. Integrated information systems for supply chain management (MRP-II, ERP systems).
9. Aggregate production planning in supply chain.
10. Short-term production scheduling.

3. TEACHING AND LEARNING METHODS - ASSESSMENT

TEACHING METHOD <i>Face-to-face, Distance learning, etc.</i>	Face to face	x
	Distance learning (asynchronous)	
	Distance learning (synchronous)	
	Others:	
USE OF INFORMATION AND COMMUNICATION TECHNOLOGIES <i>Use of ICT in teaching, laboratory education, communication with students</i>	Slides	
	E-class	x
	Virtual (simulated) laboratory training	
	Others	
TEACHING ORGANIZATION <i>The manner and methods of teaching are described in detail.</i> <i>Lectures, seminars, laboratory practice, fieldwork, study and analysis of bibliography, tutorials, placements, clinical practice, art workshop, interactive teaching, educational visits, project, essay writing, artistic creativity, etc.</i> <i>The student's study hours for each learning activity are given as well as the hours of non-directed study according to the principles of the ECTS</i>	Activity	Semester Workload
	Lectures	26
	Tutorials	
	Laboratory practice	
	Essay writing	10

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The course aims at better understanding the key challenges being faced by destination management/marketing organizations (DMOs) and the managerial solutions they employ to thrive within the current market conditions. DMOs have been contributing to ensuring a more balanced approach to tourism development by engaging both in facilitating tourism growth and listening to the positions of the destination's residents and civic society.

By the end of this course, students will be able to:

1. understand the importance and operations of DMOs
2. assess the influence of tour operators on a tourism destination such as Greece
3. appreciate the role of DMOs in tourism planning and tourism development at the local, regional or national level
apply key managerial principles to DMOs.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>

Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	x
Production of free, creative and inductive thinking	x

Others:

At the end of the course the student will have further developed the following skills/competences:

1. principles of planning a tour package
2. key principles of tourism planning from a DMO's perspective
3. ability of evaluating a tourism campaign.

2. COURSE CONTENT

1. Key characteristics of the tourism market
2. Research and analysis of the tourism market
3. Influence of tour operators and distribution channels on tourism development in Greece

4. Key characteristics and typology of DMOs (destination management/marketing organisations)
 5. Organisational structure and management principles of DMOs
 6. DMOs in Greece
 7. Tourism planning and tourism policy
 8. Strategic marketing planning for a tourist destination
 9. Setting up a tourism campaign
 10. Destination branding techniques
 11. Producing high-quality content for a tourist destination
 12. Online marketing techniques for tourist destinations
- Public relations with tourism market multipliers

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of the course is to provide theoretical and practical knowledge as regards the scientific field of management accounting. A management accounting system accumulates, classifies and reports information that will assist managers in their decision-making, planning and control activities. A significant part of the Management Accounting is Cost Accounting. A cost accounting system accumulates accounting information for calculating the cost components of a product and consequently its profit margin.

At the end of the course the student will have further developed the following skills/competences:

- Be familiar with the flow of costs in a process costing system (accounting for material, labor and overheads) and how to evaluate the stock (cost accounting techniques).
- Be familiar with the accounts of Analytical Accounting system according to the Greek Accounting standards and record accounting transactions (determining the cost of the product and its profit margin)

Moreover, at the end of this course the student should be able to:

- Use cost accounting data (cost of material, labour and overheads) for decision making purposes.
- Prepare accounting reports for budgeting (operating and financial budgets) and performance measurement for value enhancement

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The bidding and staging of cultural and sports events present one of the strategic directions of cities exploiting growth opportunities in services including tourism. This course offers an introduction to the existing knowledge on bidding, planning, marketing, management and evaluation of cultural and sports events. The course explores the theories and applied knowledge relevant to successful event management both for locals and visitors. Lectures will cover a range of events including conventions, sports events, festivals, conferences, small scale promotional events etc.

At the end of this course the student should be able:

- To become familiar with the scope and evaluation of events management.
- To understand the role of management in bidding and successfully staging cultural and sport events.
- To apply relevant management theories to the event management process.
- To apply relevant marketing and sponsorship to the vent management process
- To describe the various types of event impacts.

At the end of the course the student will have further developed the following skills/competences. They will be able:

- To effectively apply appropriate management and marketing theories and practices in the event management process.
- To measure event social and economic impacts of major events and if necessary justify public spending.
- To prepare a competitive bidding proposal for staging an event.
- To effectively work with clients in delivering event management services.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	X
Adapting to new situations	X

Others:	

2. COURSE CONTENT

<p>The size of market demand for events, the structure of demand and determinants. The event business, commercial organizations & governmental infrastructure. Social, economic, political, technological and developmental implications related to various types of events Organizational and planning issues in events, the bidding and screening process. Managing professional and volunteer staff. Financial management & budgeting. The target market of events and the marketing plan Sponsorship programs, proposal, agreements, other sources of funding. Risk management, legalities, insurance and safety issues. Planning and managing the event legacy, event evaluation</p>
--

3. TEACHING AND LEARNING METHODS - ASSESSMENT

1. LEARNING OUTCOMES

<p>Lerning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i>
<p>By the end of this course the student will be able to:</p> <p>1. Understand the importance of managing the resources in a project, and apply techniques for resource allocation and smoothing (resource leveling).</p>

2. Solve manufacturing scheduling problems in environments with a single machine, with parallel machines, as well as in flow-shop and job-shop production systems.
3. Solve personnel scheduling problems.
4. Tackle real-world routing and scheduling problems in transportation networks
5. Sequence and balance assembly lines.
6. Understand the philosophy of lean production and explain the main principles of Toyota production system.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	x
Adapting to new situations	x
Decision-making	x
Working independently	x
Team work	x
Working in an international environment	
Working in an interdisciplinary environment	
Production of new research ideas	
Project planning and management	x
Respect for difference and multiculturalism	
Respect for the natural environment	x
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	x
Production of free, creative and inductive thinking	x

Others:By the end of this course the student will, furthermore, have developed the following skills (general abilities):
 Solve scheduling problems in manufacturing environments including:
 single-machine scheduling,
 parallel machines scheduling,
 flow-shop scheduling,
 job-shop scheduling.
 sequencing and balancing of assembly lines systems.

Solve scheduling problems in services, including:
 project scheduling with resource constraints.
 personnel planning and scheduling.
 scheduling in transportation networks.

2. COURSE CONTENT

1. The nature and importance of scheduling in today industry.
2. The scheduling function in an enterprise.
3. The complexity of scheduling problems.
4. Scheduling in manufacturing systems with a single machine.
5. Scheduling in manufacturing systems with identical parallel machines.
6. Scheduling in flow-shop systems.
7. Scheduling in job-shop systems.
8. Scheduling and balancing of assembly lines.
9. Resource constrained project scheduling.
10. Resource smoothing in projects.
11. Routing and scheduling in transportation networks (the vehicle routing problems)
12. Personnel planning and scheduling.
13. Lean production and Just-in-Time systems: The Toyota production system.

3. TEACHING AND LEARNING METHODS - ASSESSMENT

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The complexity of modern civil and commercial transactions induces the need of understanding and interpreting the basic concepts of civil and commercial law, that govern the legal transactions between individuals and other bodies corporate or unincorporated. The aim of this course is to provide students with university education which will enable acquisition of knowledge of legal principles and rules of civil and commercial law, by focusing on the following topics: general principles of civil law, conditions of validity and protection of rights according to greek civil code, law of obligations, law of contracts, contractual liability, tort, property law, company law.

By the end of this course the student will have acquired the skill of understanding and interpreting the main principles and rules of civil and commercial law, as well as identifying solutions of legal problems regarding the law of obligations, contractual liability and tort.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>
<i>Production of new research ideas</i>	<i>Others...</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	
Adapting to new situations	
Decision-making	
Working independently	
Team work	
Working in an international environment	
Working in an interdisciplinary environment	
Production of new research ideas	
Project planning and management	
Respect for difference and multiculturalism	
Respect for the natural environment	
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	
Production of free, creative and inductive thinking	

Others:By the end of this course the student will furthermore be able to:
 Understand the main principles of civil and commercial law .
 Apprehend the basic rules of company law .
 Understand and interpret a selected number of legal problems in civil law, regarding the law of obligations, the law of contracts and tort.

2. COURSE CONTENT

In this course we study the main principles and rules of civil and commercial law . In particular the topics we examine include:
 principles of civil law
 legal capacity
 conditions of validity and protection of civil rights according to greek civil code

law of obligations
 law of contracts
 contractual liability
 property law
 tort
 company law

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The scope of this course is to fill the gaps between secondary school mathematics the mathematic knowledge needed by other courses of the Department.

The course is organized in unities, each covering a different branch or chapter of mathematics.

The course is addressed mostly to the first-year students of the department, but older students are not excluded.

By the end of this course the student is expected to:

- Have understood the fundamental notions of mathematics (number, variable, equation, system of equations, sequence, function, representation, probability).
- Be able to model a simple real-life problem and to choose the basic mathematical tools needed for its solution.
- Can solve standard equations and inequalities, as well as systems of them.
- Can manipulate matrices (operations – inversion – determinants).
- Be able to plot the graph of a function and to extract conclusions from it.
- Have understood the notion and the geometrical aspects of the derivative and the integral of a function.
- Can find the derivative of a function.
- Can compute an integral.
- Be able to ... the information provided by the derivative and the integral of a function.
- Know and plot the standard graphical representations of a big set of data.
- To know the basic mathematical notions needed for the rest of his undergraduate studies.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>
<i>Production of new research ideas</i>	<i>Others...</i>

- *Guidelines for writing Learning Outcomes*

During this course students will learn about the philosophy of marketing and the marketing tools that are applied to a wide range of businesses and organizations. They will be taught about the main marketing concepts such as the marketing mix and branding and they will understand the importance of research and strategic planning for effective marketing.

By the end of this course, students will be able to:

1. understand the importance of consumers' needs and preferences in their buying decisions and their consumption patterns in general
2. understand the need of basing marketing-related decisions on the research and analysis of the internal and external environment of a business or an organization
3. understand the need for strategic marketing planning
4. analyze the market situation of a particular company or product
5. perform a market segmentation according to different segmentation criteria
6. set target and make decisions concerning the promotion of a of a particular company or product
7. prepare an integrated marketing plan for a company

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

- Guidelines for writing Learning Outcomes

The course aims at a better understanding of the tourism market and at gaining knowledge about the economic and social impact of tourism on a destination and about the importance of tourism for the Greek economy.

By the end of this course, students will be able to:

1. determine and analyze key tourism data about supply and demand at the destination level (e.g. a country, an island or a city),
2. assess the competitive position of a tourist destination
3. understand the performance and further outlook concerning the development of a tourist destination (at the local or national level).

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>

			x							
COURSE TITLE	INTRODUCTION TO COMPUTERS: STRUCTURE AND PROGRAMMING									
INDEPENDENT TEACHING ACTIVITIES if credits are awarded for separate components of the course, e.g. lectures, laboratory exercises, etc. If the credits are awarded for the whole of the course, give the weekly teaching hours and the total credits			TEACHING HOURS PER WEEK		ECTS CREDITS					
Lectures and lab exercises			3		5					
<i>Add rows if necessary. The organisation of teaching and the teaching methods used are described in detail at (d).</i>										
COURSE TYPE <i>general background, special background, specialised general knowledge, skills development</i>	Basic knowledge									
PREREQUISITE COURSES:	None									
TEACHING AND ASSESSMENT LANGUAGE:	Greek									
THE COURSE IS OFFERED TO ERASMUS STUDENTS	No									
COURSE WEBPAGE (URL)	https://eclass.upatras.gr/courses/BMA421/									

1. LEARNING OUTCOMES

<p>Leraning outcomes The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</p> <p>Consult Appendix A</p> <ul style="list-style-type: none"> • Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area • Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B • Guidelines for writing Learning Outcomes <p>This course presents basic concepts of Informatics, the historical development of computing as well as the trends of the use of new technologies in the business environment. Topics covered include the hardware and structure of a typical computer including other devices with computational capabilities such as smart phones, how the central processing unit executes programs, as well as computer algorithmics and programming using the Java programming language. There is, also, a parallel lab that covers the use of new technologies in a business environment as well as computer programming using a Java Integrated Development Environment (IDE). Also, the students are introduced to the Internet and its</p>

information processing power as well as its role in innovative service development as well as key computer security concepts and defence techniques.

At the end of this course the student should be able to:

1. Understand how computers work as well as related basic hardware and software concepts,
2. Understand how a computer runs programs and processes information,
3. Develop Java programs for solving simple problems,
4. Explain how the Internet is structured and how it can be profitably used in innovation and entrepreneurship,
5. Understand how the modern corporations and businesses can benefit from the use of new technologies.
6. Understand the basic security issues in computers and networks.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	x
Adapting to new situations	
Decision-making	
Working independently	x
Team work	
Working in an international environment	
Working in an interdisciplinary environment	
Production of new research ideas	
Project planning and management	
Respect for difference and multiculturalism	
Respect for the natural environment	
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	
Production of free, creative and inductive thinking	

Others:

2. COURSE CONTENT

1. The role of Information and Communication Technologies in modern entrepreneurship and businesses,
2. The Internet and the Internet of Things: entrepreneurship opportunities and risks
3. The parts of a typical modern computing devices,
4. The operation of the Central Processing Unit in program execution and the role of memory,
5. The Java programming language,
6. Loop control and decision structures in Java,
7. Java tables,
8. Simple Java programs,
9. Computer Lab: ICTs and entrepreneurship – development of simple applications with the Java programming language

3. TEACHING AND LEARNING METHODS - ASSESSMENT

TEACHING METHOD <i>Face-to-face, Distance learning, etc.</i>	Face to face	X	
	Distance learning (asynchronous)	X	
	Distance learning (synchronous)	X	
	Others:

OPERATIONAL RESEARCH

COURSE OUTLINE

SCHOOL	SCHOOL OF ECONOMICS AND BUSINESS		
DEPARTMENT	BUSINESS ADMINISTRATION		
LEVEL OF COURSE	UNDERGRADUATE		
COURSE CODE	BA_194	SEMESTER OF STUDIES	FIFTH
COURSE TITLE	OPERATIONAL RESEARCH		
INDEPENDENT TEACHING ACTIVITIES σε περίπτωση που οι πιστωτικές μονάδες απονέμονται σε διακριτά μέρη του μαθήματος π.χ. Διαλέξεις, Εργαστηριακές Ασκήσεις κ.λπ. Αν οι πιστωτικές μονάδες απονέμονται ενιαία για το σύνολο του μαθήματος αναγράψτε τις εβδομαδιαίες ώρες διδασκαλίας και το σύνολο των πιστωτικών μονάδων	TEACHING HOURS PER WEEK	ECTS CREDITS	
Lectures and laboratory work	2 (lect.) 2(lab.or tutorial)	5	
Προσθέστε σειρές αν χρειαστεί. Η οργάνωση διδασκαλίας και οι διδακτικές μέθοδοι που χρησιμοποιούνται περιγράφονται αναλυτικά στο 4.			
COURSE TYPE Υποβάθρου , Γενικών Γνώσεων, Επιστημονικής Περιοχής, Ανάπτυξης Δεξιοτήτων	Field of Science		
PREREQUISITE COURSES:	There are no prerequisite courses. It is, however, recommended that students have at least a basic knowledge of Differential and Integral Calculus as well as Statistics.		
TEACHING AND ASSESSMENT LANGUAGE:	Greek.		
THE COURSE IS OFFERED TO ERASMUS STUDENTS	No		
COURSE WEBPAGE (URL)	https://eclass.upatras.gr/courses/BMA418/		

13. LEARNING OUTCOMES

<p>Lerning outcomes</p> <p>Περιγράφονται τα μαθησιακά αποτελέσματα του μαθήματος οι συγκεκριμένες γνώσεις, δεξιότητες και ικανότητες καταλλήλου επιπέδου που θα αποκτήσουν οι φοιτητές μετά την επιτυχή ολοκλήρωση του μαθήματος.</p> <p>Συμβουλευτείτε το Παράρτημα Α (ξεχωριστό αρχείο στο e-mail)</p> <ul style="list-style-type: none"> • Περιγραφή του Επιπέδου των Μαθησιακών Αποτελεσμάτων για κάθε ένα κύκλο σπουδών σύμφωνα με Πλαίσιο Προσόντων του Ευρωπαϊκού Χώρου Ανώτατης Εκπαίδευσης • Περιγραφικοί Δείκτες Επιπέδων 6, 7 & 8 του Ευρωπαϊκού Πλαισίου Προσόντων Διά Βίου Μάθησης και Παράρτημα Β • Περιληπτικός Οδηγός συγγραφής Μαθησιακών Αποτελεσμάτων <p>The aim of the course is to present the process of making decisions in complex business problems using the techniques of Management Science. In particular, students will be introduced into the methodology and the basic techniques of Linear Programming and the formulation of Integer Programming models. Examples of special cases of Integer Programming models and their applications will also be discussed.</p>

At the end of this course the student should be able to:

6. Formulate linear programming (LP) and integer programming (IP) models.
7. Understand the basic concepts related to the solution of LPs (reduced cost, duality, etc).
8. Understand and interpret the solution results.
9. Comprehend the formulation and the properties of special LP and IP models (transportation, assignment, set covering etc).

General Abilities

Λαμβάνοντας υπόψη τις γενικές ικανότητες που πρέπει να έχει αποκτήσει ο πτυχιούχος (όπως αυτές αναγράφονται στο Παράρτημα Διπλώματος και παρατίθενται ακολούθως) σε ποια / ποιες από αυτές αποσκοπεί το μάθημα:

Αναζήτηση, ανάλυση και σύνθεση δεδομένων και πληροφοριών, με τη χρήση και των απαραίτητων τεχνολογιών

Προσαρμογή σε νέες καταστάσεις

Λήψη αποφάσεων

Αυτόνομη εργασία

Ομαδική εργασία

Εργασία σε διεθνές περιβάλλον

Εργασία σε διεπιστημονικό περιβάλλον

Παράγωγή νέων ερευνητικών ιδεών

Σχεδιασμός και διαχείριση έργων

Σεβασμός στη διαφορετικότητα και στην πολυπολιτισμικότητα

Σεβασμός στο φυσικό περιβάλλον

Επίδειξη κοινωνικής, επαγγελματικής και ηθικής υπευθυνότητας και ευαισθησίας σε θέματα φύλου

Άσκηση κριτικής και αυτοκριτικής

Προαγωγή της ελεύθερης, δημιουργικής και επαγωγικής σκέψης

At the end of the course the student will have further developed the following skills/competences:

1. Solving LP and IP problems using relevant optimizers.
2. Reporting and presenting the results.

14. COURSE CONTENT

1. Linear Programming (problem formulation, solution methods, solution by computer)
2. Duality
3. Sensitivity Analysis – Economic interpretation of the results
4. The Transportation Problem
5. Integer Programming (problem formulation, solution methods, special IP models)

15. TEACHING AND LEARNING METHODS - ASSESSMENT

TEACHING METHOD <i>Πρόσωπο με πρόσωπο, Εξ αποστάσεως εκπαίδευση κ.λπ.</i>	Lectures and laboratory work face to face.	
USE OF INFORMATION AND COMMUNICATION TECHNOLOGIES <i>Χρήση Τ.Π.Ε. στη Διδασκαλία, στην Εργαστηριακή Εκπαίδευση, στην Επικοινωνία με τους φοιτητές</i>	Use of Information and Communication Technologies (ICTs) (e.g. powerpoint) in teaching. The lectures content of the course for each chapter are uploaded on the e-class platform, in the form of a series of pdf files, from where the students can freely download them using a password which is provided to them at the beginning of the course. Use of specialized Linear and Integer Programming optimization software	
TEACHING ORGANIZATION <i>Περιγράφονται αναλυτικά ο τρόπος και μέθοδοι διδασκαλίας. Διαλέξεις, Σεμινάρια, Εργαστηριακή Άσκηση, Άσκηση Πεδίου, Μελέτη & ανάλυση βιβλιογραφίας, Φροντιστήριο, Πρακτική (Τοποθέτηση), Κλινική Άσκηση, Καλλιτεχνικό Εργαστήριο, Διαδραστική διδασκαλία, Εκπαιδευτικές επισκέψεις, Εκπόνηση μελέτης (project), Συγγραφή εργασίας / εργασιών, Καλλιτεχνική δημιουργία, κ.λπ.</i>	Activity	Semester Workload
	Lectures (3 contact hours per week x 13 weeks)	39
	Laboratories (1 contact hour per week x 13 weeks) - solving of representative problems	13
	Group project – formulation, solution and reporting on a realistic problem	23
	Hours for private study of the student and preparation of home-works	50

<p>Αναγράφονται οι ώρες μελέτης του φοιτητή για κάθε μαθησιακή Activity καθώς και οι ώρες μη καθοδηγούμενης μελέτης ώστε ο συνολικός φόρτος εργασίας σε επίπεδο εξαμήνου να αντιστοιχεί στα standards του ECTS</p>	<p>Total number of hours for the Course (25 hours of work-load per ECTS credit)</p>	<p>125 hours (total student work-load)</p>
<p>STUDENT ASSESSEMNT Περιγραφή της διαδικασίας αξιολόγησης</p> <p>Γλώσσα Αξιολόγησης, Μέθοδοι αξιολόγησης, Διαμορφωτική ή Συμπερασματική, Δοκιμασία Πολλαπλής Επιλογής, Ερωτήσεις Σύντομης Απάντησης, Ερωτήσεις Ανάπτυξης Δοκιμίων, Επίλυση Προβλημάτων, Γραπτή Εργασία, Έκθεση / Αναφορά, Προφορική Εξέταση, Δημόσια Παρουσίαση, Εργαστηριακή Εργασία, Κλινική Εξέταση Ασθενούς, Καλλιτεχνική Ερμηνεία, Άλλη / Άλλες</p> <p>Αναφέρονται ρητά προσδιορισμένα κριτήρια αξιολόγησης και εάν και που είναι προσβάσιμα από τους φοιτητές;</p>	<p>I. Final written exam (80%) which includes:</p> <ul style="list-style-type: none"> - Theoretical questions - Practical exercises <p>II. Presentation of group projects (20%)</p> <p>The group project is optional. Students who elect not to submit the group project are assessed on the basis of the final written exam only.</p>

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

This course builds a foundation of knowledge on the broad understanding of strategy and strategic management. Students are introduced to what strategy is, and how it develops in contemporary organizations. They are also introduced to the criteria of a successful strategy and how to assess if a chosen strategy fits to the environment/industry and offers to the organization sustainable advantage. Porter's generic strategies are presented and discussed in relevant case-studies along with the most common growth strategies.

At the end of this course the student should be able to:

- Understand what is strategy and strategic thinking
- Become familiar with the factors which drive. sustainable performance and the modes of strategic –making.
- Get familiar with the strategic analysis of the external and internal environment of an organization.
- Be able to identify and critique the generic strategies followed by different types of organizations.

At the end of the course the student will have further developed the following skills/competences:

- To define strategic issues and employ theory to critically analyze them.
- To identify corporate-level, business-level and functional strategies in organizations.
- To analyze the nature of competition in an industry and identify factors which contribute to its attractiveness.
- To apply theoretical frameworks to assess an organization’s sustainable advantage.
- To analyze how an organization differentiates itself and its products
- To appraise the trade-offs for an organization on how far to integrate and diversify

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

STRATEGIC MANAGEMENT II

COURSE OUTLINE

SCHOOL	SCHOOL OF ECONOMICS AND BUSINESS		
DEPARTMENT	BUSINESS ADMINISTRATION		
LEVEL OF COURSE	UNDERGRADUATE		
COURSE CODE	BA_225	SEMESTER OF STUDIES	6 th
COURSE TITLE	STRATEGIC MANAGEMENT II		
INDEPENDENT TEACHING ACTIVITIES σε περίπτωση που οι πιστωτικές μονάδες απονέμονται σε διακριτά μέρη του μαθήματος π.χ. Διαλέξεις, Εργαστηριακές Ασκήσεις κ.λπ. Αν οι πιστωτικές μονάδες απονέμονται ενιαία για το σύνολο του μαθήματος αναγράψτε τις εβδομαδιαίες ώρες διδασκαλίας και το σύνολο των πιστωτικών μονάδων	TEACHING HOURS PER WEEK	ECTS CREDITS	
Lectures, seminars and laboratory work	3	5	
<i>Προσθέστε σειρές αν χρειαστεί. Η οργάνωση διδασκαλίας και οι διδακτικές μέθοδοι που χρησιμοποιούνται περιγράφονται αναλυτικά στο 4.</i>			
COURSE TYPE <i>Υποβάθρου, Γενικών Γνώσεων, Επιστημονικής Περιοχής, Ανάπτυξης Δεξιοτήτων</i>	Field of Science		
PREREQUISITE COURSES:	There are no Prerequisite Courses: Students should possess sound knowledge of STRATEGIC MANAGEMENT I		
TEACHING AND ASSESSMENT LANGUAGE:	Greek.		
THE COURSE IS OFFERED TO ERASMUS STUDENTS	NO		
COURSE WEBPAGE (URL)	https://eclass.upatras.gr/courses/BMA523/		

17. LEARNING OUTCOMES

Leraning outcomes

Περιγράφονται τα μαθησιακά αποτελέσματα του μαθήματος οι συγκεκριμένες γνώσεις, δεξιότητες και ικανότητες καταλλήλου επιπέδου που θα αποκτήσουν οι φοιτητές μετά την επιτυχή ολοκλήρωση του μαθήματος.

Συμβουλευτείτε το Παράρτημα Α (ξεχωριστό αρχείο στο e-mail)

- Περιγραφή του Επιπέδου των Μαθησιακών Αποτελεσμάτων για κάθε ένα κύκλο σπουδών σύμφωνα με Πλαίσιο Προσόντων του Ευρωπαϊκού Χώρου Ανώτατης Εκπαίδευσης
- Περιγραφικοί Δείκτες Επιπέδων 6, 7 & 8 του Ευρωπαϊκού Πλαισίου Προσόντων Διά Βίου Μάθησης και Παράρτημα Β
- Περιληπτικός Οδηγός συγγραφής Μαθησιακών Αποτελεσμάτων

The aim of the course is to provide the necessary knowledge for analyzing strategic challenge companies face and strengthens students' capabilities on how to gather, generate, and implement necessary knowledge for analyzing and building firms' corporate strategies.

By the end of this course the student should be able to:

1. Understand and develop strategies for competing in international markets.

2. Understand the difference between business and corporate strategies.
3. Develop corporate objectives and formulate corporate strategies.
4. Understand how to integrate ethics and corporate social responsibility in strategy.
5. Define the most adequate implementation systems and processes.

General Abilities

Λαμβάνοντας υπόψη τις γενικές ικανότητες που πρέπει να έχει αποκτήσει ο πτυχιούχος (όπως αυτές αναγράφονται στο Παράρτημα Διπλώματος και παρατίθενται ακολούθως) σε ποια / ποιες από αυτές αποσκοπεί το μάθημα:

Αναζήτηση, ανάλυση και σύνθεση δεδομένων και πληροφοριών, με τη χρήση και των απαραίτητων τεχνολογιών

Προσαρμογή σε νέες καταστάσεις

Λήψη αποφάσεων

Αυτόνομη εργασία

Ομαδική εργασία

Εργασία σε διεθνές περιβάλλον

Εργασία σε διεπιστημονικό περιβάλλον

Παράγωγή νέων ερευνητικών ιδεών

Σχεδιασμός και διαχείριση έργων

Σεβασμός στη διαφορετικότητα και στην πολυπολιτισμικότητα

Σεβασμός στο φυσικό περιβάλλον

Επίδειξη κοινωνικής, επαγγελματικής και ηθικής υπευθυνότητας και ευαισθησίας σε θέματα φύλου

Άσκηση κριτικής και αυτοκριτικής

Προαγωγή της ελεύθερης, δημιουργικής και επαγωγικής σκέψης

At the end of the course the student will have further developed the following skills/competences:

1. An understanding of the strategic issues at corporate level.
2. An ability to identify and analyse major strategic problems and challenges the multi business companies face.
3. An ability to build good corporate strategies and to implement them.

Generally, by the end of this course the student will, furthermore, have develop the following general abilities (from the list above):

Searching, analysis and synthesis of facts and information, as well as using the necessary technologies

Adaptation to new situations

Decision making

Autonomous (Independent) work

Promotion of free, creative and inductive thinking

Respect to natural environment

Respect to differentiation and multiculturalism

Work in international environment

Social and ethical responsibility in gender issues

18. COURSE CONTENT

1. Strategic choices for competing in international markets.
2. Corporate strategies as diversification in multinational company.
3. Organizational choices for good strategy execution.
4. Identifying organizational structure, corporate culture, and leadership to execute strategies.
5. Strategic choice between internal development, strategic alliance, and mergers and acquisitions.

19. TEACHING AND LEARNING METHODS - ASSESSMENT

<p>TEACHING METHOD Πρόσωπο με πρόσωπο, Εξ αποστάσεως εκπαίδευση κ.λπ.</p>	Lectures

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

Σκοπός του μαθήματος είναι να κατανοήσουν οι φοιτητές το εννοιολογικό υπόβαθρο και το βασικό θεσμικό και νομοθετικό πλαίσιο του εργατικού δικαίου και των εργασιακών σχέσεων. Η κατανόηση των ιδιαιτεροτήτων του εργατικού δικαίου, και ιδίως της ατομικής σύμβασης εξαρτημένης εργασίας, συνδέεται με την ανθρώπινη εργασία και τα δικαιώματα και τις υποχρεώσεις του εργαζόμενου ως πυρήνα του εργατικού δικαίου, που εξετάζονται με γνώμονα την αξιοπρέπεια και την προσωπικότητά του, καθώς και τις συνταγματικά κατοχυρωμένες συνδικαλιστικές ελευθερίες και δικαιώματα.

Στο τέλος αυτού του μαθήματος ο φοιτητής θα έχει αναπτύξει τη δεξιότητα κατανόησης και εμβάθυνσης στην εννοιολογική οριοθέτηση της ατομικής σύμβασης εργασίας, τα βασικά δικαιώματα και υποχρεώσεις του εργαζόμενου, τη λύση και καταγγελία της σύμβασης εργασίας, και σε θεμελιώδη ζητήματα συλλογικού εργατικού δικαίου.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>
<i>Production of new research ideas</i>	<i>Others...</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

This course discusses the use of new technologies in public administrations combined with organizational changes and new skills towards improving public services and strengthening democratic processes for the benefit of the citizen, in conjunction with the European, national, and international policies. Also, the course examines the details of implementation and operation of some of the most important eGovernment systems for supporting electronic voting (eVoting), electronic health (eHealth) and electronic justice (eJustice). Finally, the course discusses the main security and privacy issues that arise for citizens from the use of eGovernment systems.

At the end of this course the student should be able to:

1. Understand the benefits of new technologies towards offering better public services to citizens,
2. List and discuss the required skills of the operators of these technologies,
3. Indicate the improvements in public services through the use of new technologies both at national and international level,
4. Discuss the advantages and disadvantages of the technologies supporting eVoting, eHealth, and eJustice.
5. To state the main security risks and privacy breaches from the use of e-government systems.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>

5. LEARNING OUTCOMES

<p>Learning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i> <p>The course involves two major sections.</p> <p>In the first section we examine the electronic marketing strategy, the e-buyer characteristics, the optimization and the evaluation of e-marketing performance. Specifically, we integrate the business marketing strategies with the e-business applications' potentials. In this scope, we focus on such marketing concepts and tools, as database marketing, customer segmentation and targeting, the customized product bundle, the on-line direct marketing, the e-payment systems, the</p>
--

customer retention and recalling through the WWW, the mobile phone and other Internet platforms and tools. The objectives are the optimization of business visibility, buyers' accessibility and e-business strategy performance.

The second section discusses principles and basic techniques of information systems and electronic transactions security.

By the end of this course the student should be able to understand:

1. The electronic marketing concepts, such as interactivity, personalization-customization and information density.
2. The e-business evaluation models, such as value proposition, revenue model, market opportunity.
3. The e-business strategy models, such as business-to-consumer, business-to-business, customer-to-customer, customer-to-business, auctions, reverse auctions, Customer Relationship Management (CRM) Systems, Search Engine Optimization (SEO), etc.
4. The optimization of the Web page design, focusing at differentiated marketing communication targets.
5. The e-payment systems.
6. The optimization of e-business performance.
7. The evaluation tools of e-business strategies.
8. Understanding of security issues of information systems and electronic transactions.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	
Adapting to new situations	
Decision-making	
Working independently	
Team work	
Working in an international environment	
Working in an interdisciplinary environment	
Production of new research ideas	
Project planning and management	

Respect for difference and multiculturalism	
Respect for the natural environment	
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	
Production of free, creative and inductive thinking	

Others: At the end of the course the student will be able to:

Develop a marketing plan in various electronic contexts

Develop and manage a business webpage and presence

Develop and manage various social network and on-line communities

Use various e-business performance optimization and evaluation tools and models

Understanding of security issues of information systems and electronic transactions.

6. COURSE CONTENT

1. E-commerce, basic concepts and tools
2. Major e-business models
3. Internet and WWW characteristics and potentials
4. Organizing the E-business presence
5. Management of social networks and electronic communities
6. Criteria and tools of the e-business performance optimization
7. Evaluation of e-business strategy
8. Introduction to cryptography and protection of personal data.
9. Basic principles of information and communication systems security.

1. LEARNING OUTCOMES

<p>Leraning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i>
<p>Upon successful completion of the course, students will have proven knowledge and understanding of issues related to:</p> <ul style="list-style-type: none"> - The theory of international trade - The impact of international trade on prosperity and income

- The international movements of factors of production, and especially of labour and immigration
- Tariff and non-tariff barriers to trade
- The impact of globalization and international trade in goods on national economies

This knowledge is supported by advanced scientific textbooks and includes views arising from modern cutting-edge developments such as non-tariff measures (NTMs), trade agreements and trade zones.

Students should also be able:

- to use the above knowledge to approach issues of international trade and exploit either incentives or barriers to trade in the private and public sectors.
- to gather and interpret international trade data from the World Trade Organization, European and National Databases, and especially from the Eurostat and the relevant United Nations agencies and divisions, and use this data to shape judgments that include reflection on the development of international trade and the widening and depth of trade
- to communicate information, ideas, problems and solutions to trade in goods, capital movements through multinational companies and foreign direct investment to specialized audiences but also to express the complex concepts of international trade and commercial economic policy to the general public
- to develop skills needed to continue in further studies with a high degree of autonomy

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	x

Criticism and self-criticism	
Production of free, creative and inductive thinking	
Others:	

2. COURSE CONTENT

International trade – Introduction: International trade in economic science, international trade and international economics, the international trade of Greece and of European Union.

Theory of International Trade: The Ricardian model, labor productivity and comparative advantage. The Heckscher - Ohlin model: resources and international trade. The Neoclassical Model Template of International Trade: Terms of Trade and Welfare - Export and Import Oriented Growth - International Transfers of Income - Effect of Tariffs and Export Subsidies on Trade Terms - The Stolper - Samuelson Theorem - Rybczynski Theorem - Offer Curves. The pattern of intra-industry trade. Economies of scale, incomplete competition, product diversification and international trade.

International movement of factors of production.

International Trade Policy: Trade Policies, analytical framework of partial and general equilibrium - "small" and "big" country - measuring the benefits and losses of commercial policy. Method of application and cost / benefit of the main trade policies: tariffs - export subsidies - quotas - voluntary export restrictions - other trade policy instruments. The political economy of trade policy: arguments for and against international trade - international negotiations - preferential trade agreements - free trade areas.

3. TEACHING AND LEARNING METHODS - ASSESSMENT

1. LEARNING OUTCOMES

Lerning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The strategic choices of a firm are influenced by the actions of its competitors, who in turn take into consideration the possible moves of the firm and of other agents. Such interactions between competitors in making strategic decisions are common among firms as well as between people. Game Theory studies these scenarios and enhances our understanding of the parameters that determine decision-making in a multi-agent environment.

The learning outcomes of this course include:

- identifying real-world situations as Game Theory scenarios
- understanding the range and limitations of Game Theory
- understanding of the basic classes of games
- solving simple games

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>
<i>Production of new research ideas</i>	<i>Others...</i>

Production of new research ideas	
Project planning and management	
Respect for difference and multiculturalism	
Respect for the natural environment	
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	
Production of free, creative and inductive thinking	

Others:

Upon successful completion of the course, the student will be able to

- model correctly as games various real-world decision-making scenarios
- interpret correctly the solutions of a game.

2. COURSE CONTENT

- games with sequential moves
- games with simultaneous moves
- mixed strategies
- combining sequential and simultaneous moves

- uncertainty and information
- repeated games
- evolutionary games
- applications and selected topics of Game Theory

3. TEACHING AND LEARNING METHODS - ASSESSMENT

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of the course is to introduce the necessary mathematical tools to the students of the Department regarding solution of systems of equations and calculus.

At the end of this course the student will be able to:

- Forms problems in finance.

- Performs operations on matrices and vectors, calculates determinants, and matrix inversions.
- Solves systems of linear equations.
- Effectively uses all mathematical tools of comparative static analysis for limits, continuity, differentiability, partial derivatives, derivatives of implicit functions.
- Optimize functions of one variable.
- Handles exponential and logarithmic functions.

It is the first of two compulsory courses in mathematics to acquire all the initial mathematical tools for basic research in business management subjects.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- *Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area*
- *Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B*
- *Guidelines for writing Learning Outcomes*

The Object of Macroeconomics is the study of the economy as a whole. Some of the main issues addressed in Macroeconomics are: the measurement of macroeconomic aggregates, the problems that can arise in an economy (recession, unemployment, inflation), the economic policy measures that can be implemented for their resolution or limitation and the interactions among national economies. A main objective of Macroeconomics is the analysis of the causes of changes in economic aggregates, the economic policy measures that can be used and the consequences of these measures. On the basis of this analysis different theoretical models are formed (classical/neoclassical theory,

Keynesian theory, etc.). Awareness of this theoretical diversity in the field of Macroeconomics is the main focus of the course.

At the end of this course the student should be able to understand:

- The macroeconomic aggregates and their measurement.
- The basic classical-neoclassical macroeconomic theory.
- The simple Keynesian model.
- The basic classical-neoclassical and Keynesian theory of money.
- The basic IS-LM model.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

1. LEARNING OUTCOMES

<p>Lerning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i>
<p>This course is a continuation of Macroeconomics I, and it aims to examine important issues of macroeconomic theory and policy. After successful completion of the course, students are expected to:</p> <ul style="list-style-type: none"> - Understand how an open economy operates and how it may react to policy changes and exogenous shocks - Understand the factors that generate growth

- Understand the factors that can lead to changes in aggregate consumption and investment
- Understand why a country may accumulate public debt, when the debt is unsustainable and what this may imply for the government-bond market
- Are able to use functional relationships, diagrams, and the findings of empirical research to suggest ways to address/resolve key macroeconomic problems
- Are able to solve exercises, identifying equilibrium values for macroeconomic variables and calculating how they may change when external events or changes in economic policy occur

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>

Others:

2. COURSE CONTENT

Open Economy: National income constraint, balance of payments, trade balance. Determinants of net exports. Interest rates, exchange rates, determinants of international capital flows. Equilibrium in the open economy. Analysis of effects of policy changes and external shocks. Role of the exchange rate system, role of the degree of international capital mobility. Growth: Savings, productivity, technology and human capital. Growth accounting, Solow residual. The extended Solow model, dynamic adjustment and steady-state equilibrium. 'Golden rule' of capital accumulation. Public sector. Globalization. Poverty traps. Absolute & relative convergence of incomes. Endogenous growth, the AK model. Consumption & Investment: Consumption and intertemporal choice. The life-cycle model, the permanent income model. Short- & long-run propensity to consume. Investment demand, expectations & uncertainty. Present-value model, accelerator model, neoclassical investment model, Tobin's-Q model. Fiscal Policy, Budget Deficits & Public Debt: The income constraint of the state, ways of financing public spending. Reasons for accumulating deficits. Sustainable and unsustainable public debt. Monetization of public debt. The market for government bonds, risk premiums, speculation, rating.

THE COURSE IS OFFERED TO ERASMUS STUDENTS										
COURSE WEBPAGE (URL)	https://eclass.upatras.gr/courses/BMA531/									

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The course aims at better understanding the distinguishing characteristics of services that strongly affect the way service companies are managed and marketed as well as at preparing and executing proper marketing plans for services.

By the end of this course, students will be able to:

1. identify and understand the distinguishing characteristics of services that impact the way service companies are managed and marketed,
2. prepare a marketing plan for a service company,
3. approach the tourism market, in particular, with proper marketing planning.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>

1. LEARNING OUTCOMES

Lerning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

This undergraduate course deals with the research methods principal approaches, and, specifically, in the area of marketing. On the whole, we teach the steps of the scientific methodology of the basic research, regardless of the research topic, that are necessary in order to safeguard reliable and valid findings and conclusions.

At the end of this course the student should be able to understand:

1. The value and necessity of original research.
2. The distinction between management and research problem.
3. The process of identification of the research main-point and hypotheses.
4. The principal research methods and techniques that refer to secondary and primary research data.
5. The value and the process of qualitative research, through personal interviews, focus groups, social media interaction, etc.
6. The value and the process of quantitative research in validating the research findings through statistical analysis.
7. The value and use of the Internet in secondary and primary research data collection.
8. The process of qualitative and quantitative research through the Social Media scanning.
9. Database research, and big data quantitative analysis.
10. Sampling and research sample determination.
11. Statistical analysis through the package SPSS, for validation of reliability and validity research data and support of research hypotheses.
12. Research findings interpretation, conclusions and implications for practitioners and academics.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>
<i>Production of new research ideas</i>	<i>Others...</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	x
Adapting to new situations	
Decision-making	x
Working independently	x
Team work	
Working in an international environment	
Working in an interdisciplinary environment	
Production of new research ideas	
Project planning and management	

Respect for difference and multiculturalism	
Respect for the natural environment	
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	x
Production of free, creative and inductive thinking	

Others: At the end of the course the student will be able to:

1. Distinguish between management and research problem.
2. Identify the research main-point and hypotheses.
3. Match the research method to the research problem.
4. Distinguish among the important and the least important variables for inclusion in a specific research study.
5. Structure a quantitative research instrument.
6. Set the research field, the research framework, the research sample and the sampling method.
7. Select data and enter them in the SPSS statistical program.
8. Control for research data reliability and validity
9. Analyze the data, in order to examine the research hypotheses.
10. Appropriately interpret the data and extract safe conclusions.
11. Compose the research report.
12. Use the Social Media and the Internet in order to develop the research questions and select the research data.
13. Interpret the research findings in order to formulate the conclusions and implications of the research study to the interested subjects and the academic community.

2. COURSE CONTENT

1. Defining the management problem and the research problem.
2. Management and Research problem (research main-point) and hypotheses.
3. Secondary and Primary data.
4. The use of Social Media and the Internet for market research and data collection.
5. Research design, exploratory, descriptive, causal research design.
6. Research instrument formulation.
7. Sampling, sample framework, sample field, sample size and sampling methods.
8. Data collection and entry on the SPSS.
9. Reliability and validity tests and errors.
10. Statistical analyses for examination of the research hypotheses.
11. Findings interpretation and conclusions.
12. Report formulation of the exploratory and main research.
13. Interpretation of research findings, conclusions and implications to the marketing practitioners and the academic community.

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The course presents the basic notions of economic theory and among them those of fluctuations and technology as embraced by the various schools of economic thought, from the early 19th century till now. Students will become acquainted with the questions revolving around economic theory and policy, through the analysis of fluctuations and technology. Also, students will become familiar with the complex ties between economic theory and technology, conceived either as being endogenous or exogenous. The course focuses on

the study of the Classical, the Marxist, the Austrian, the Keynesian, the Schumpeterian and the Neoclassical Schools of Thought, as well as on other contemporary conceptualizations of fluctuations and technology. After all, the process of scientific discovery, did not follow a linear pattern based on a single path, but rather evolved non-linearly, based on a set of different - often contradicting - assumptions, theories, methods and findings, expressing the various schools and / or strands of economic thought.

After the successful completion of the course, students will be able to:

1. Understand the basic economic notions, the context in which they were developed and the process of their evolution.
2. Draw conclusions based on the theoretical framework adopted by the various schools of economic thought.
3. Recognise the policy implications stemming out of the theories developed.
4. Study and present a scholarly paper.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>
<i>Production of new research ideas</i>	<i>Others...</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	
Working independently	
Team work	
Working in an international environment	
Working in an interdisciplinary environment	
Production of new research ideas	
Respect for difference and multiculturalism	
Respect for the natural environment	
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	
Production of free, creative and inductive thinking	

Others: After the successful completion of the course, students will have the following abilities: To understand the processes that took place in the various scientific revolutions or paradigm shifts in Economics as a social science. To understand the way that technology and economic fluctuations evolve. To understand the way in which the neoclassical school of economic thought became dominant in the discipline.

1. COURSE CONTENT

1. Basic notions and objects of the course.
2. Nonsystematic theories
2.1 Features: Periodic phenomenon or irregular trend
2.2 Equilibrium or Fluctuations
2.3 The end of the Classical approach
3. Systematic theories
3.1 Long-waves
3.2 Technology and Business Cycles
4. Non-Keynesian approaches
4.1 Austrian School
4.2 Marxist School
5. Keynesian approaches
5.1 Keynes and Keynesian approaches
5.2 Post-keynesian, New-Keynesian and other approaches
6. Newer approaches
6.1 Real Business Cycles Theory
6.2 Neo-Schumpeterian approaches
6.3 Other current approaches

- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of the course is to develop knowledge and skills relating to the computerized accounting system. Specifically, a computerized accounting software will be applied to record journal entries, produce trial balances and financial statements and close the books.

At the end of the course the student will have further developed the following skills/competences:

1. Recognition of the business documents (such as purchase invoices, receipts, and cash register tapes) that describe a transaction in a double entry accounting system

2. Recording accounting events through journal entries

Moreover, at the end of this course the student should be able to:

1. Explain the structure of the accounts according to the Greek Accounting Standards.

2. Obtain technical proficiency in the use of double entry accounting techniques and the methodology for the preparation of trial balances and basic financial statements.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

Search for, analysis and synthesis of data and information, with the use of the necessary technology

5. COURSE CONTENT

1. Creation of a virtual company of a specific legal form and activity (keeping a double-entry accounting system according to the Greek Accounting Standards).
2. Description of the business transactions of the virtual company throughout the financial year
3. Open accounting books (appropriate accounting entries)
4. Entry the accounting specifications to the computerized accounting software
5. Creation of the accounts given the accounting events of the virtual company
6. Journal entries
7. Compute Value Added Tax and National Insurance Contributions and complete the appropriate business documents
8. Adjusting accounting entries related to: Accruals and Prepayments, Depreciation, Impairment of Assets, Provisions, Bank reconciliations, Correction of accounting error
9. Production of trial balances (post-closing trial balance and closing trial balance)
10. Production and printing of basic financial statements
11. Close accounting books

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of the course is to introduce the student to the fundamental concepts of microeconomic theory and the basic results of the mathematical structure that are important to understand how economists develop models describing the relationships and behavior of market participants (households, businesses, state) in order to explain the pricing of goods and services that are traded on it.

By the end of this course the student will be able to:

- The opportunity cost.
- Effective allocation of limited resources.
- The Law of Supply and Demand.
- The determination of the equilibrium value.
- The utility theory.
- Elasticity.
- Production theory.
- Different costs as well as with maximization of business profits.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>

Others: By the end of this course the student will, furthermore, have developed the following skills (general abilities):

1. Calculate maximum utility.
2. Estimate elasticity.
3. Analyze the pattern of timeless consumption in a state of uncertainty.
4. Calculate the various costs of the business.
5. Calculate the maximum profit of the producer.

2. COURSE CONTENT

1. Introductory concepts, consumer preference theory, utility.
2. Maximizing a utility function.
3. Income and substitution effects.
4. Demand of goods.
5. Elasticity.
6. Production functions.
7. Cost Functions.
8. Maximization of profit.

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

- Microeconomics II follows on the course of Microeconomics I. Utilizing (and composing) analytical “tools” which have already been taught within Microeconomics I, the course of Microeconomics II examines market characteristics in which enterprises operate and investigates the pricing of goods in different markets. Then, it examines the determination of factor prices and, hence, income distribution among holders.

- At the end of the course students will be able to:

1. Understand the various market structures in which enterprises operate.
2. Be aware of the differences in the formation of the equilibrium prices (and quantities), depending on the structure of the market in which an enterprise operates.
3. Develop a critical point of view of the social benefit of various markets' structures.
4. Know the basic Neoclassical theory of income distribution.

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of this course is to build up students' general skills in business communication and correspondence, both at a written and oral level. The course initially explores essential principles and guidelines of business communication and the purposes the latter serves in the contemporary business environment.

At the end of the course students will have:

1. practiced and improved all four English language skills
2. introduced themselves to principles of Business Communication and Correspondence
3. practiced writing written documents (emails, business letters, job solicitation documents)
4. practiced their oral skills in negotiation and delivery of oral presentations for various purposes.

General Abilities
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

This course aims to give students further training in reading academic texts in the field, familiarise them with the conventions of academic writing and improve speaking in academic contexts. More specifically it aims to:

- enable students to identify the main points of academic texts in different genres (textbooks, academic and popularized articles) and get quickly the gist of these texts, that is, both skim and scan depending on their reading aim each time, as well as read critically. In the case of research articles, this course aims to train students to identify the structure of the different sections, as well as their function and the points where the important information lies
- familiarize students with the conventions of academic writing
- give them training in paraphrasing, summarizing and writing cohesive and coherent paragraphs and essays
- research a topic and make a power-point presentation and answer questions, in English.

Thus, having completed the course, students are expected to be able to read more efficiently academic texts, especially academic articles, in the field, write better structured texts and make a presentation in English on a topic relevant to the discipline, using the appropriate language, signposting and body language.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>

THE COURSE IS OFFERED TO ERASMUS STUDENTS	X									
COURSE WEBPAGE (URL)	https://eclass.upatras.gr/courses/BMA635/									

1. LEARNING OUTCOMES

Lerning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The present course focuses on presenting the most important concepts of advertising, public relations, sales promotion, direct and interactive marketing, as sub-elements of integrated marketing communications. Initially, the predominant communication models and strategies are developed, in light of establishing an integrated communications program. Subsequently, the course assesses individual communication strategy decisions, with particular emphasis on message design and media selection. The nature and effects of different marketing communication types on the audience are also examined, as well as the methods of assessing their effectiveness. Finally, beyond the commercial dimension of marketing communications, the course attempts to appraise their institutional role in contemporary society.

Through the review of up to date literature, examination of good practices with the use of case studies, analysis of numerical examples and exercises, by the end of the course the student will be able to understand:

1. The role of integrated marketing communications within the broader marketing process
2. The components of the marketing communications mix, as well as their specific characteristics, in the context of the broader marketing mix
3. The methods employed to identify target audiences, the impact of marketing communications on audience members and the effectiveness of marketing communications programs
4. The communication process and its basic elements (e.g. source, message, media and receivers)
5. The importance of contextual factors in the development of an effective communication strategy
6. The links between business goals, marketing goals and communication goals
7. The fundamental message and media strategy decisions
8. The predominant public relations' and publicity, direct and internet marketing, and sales promotion techniques
9. The social / institutional role of advertising

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>
<i>Production of new research ideas</i>	<i>Others...</i>

1.LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of the course is to present content and contemporary issues in the field of Organizational Behavior. In particular, the objective is to enhance critical approach on Organizational Behavior theories and analysis of relevant case studies.

At the end of this course the student should be able to:

1. Understand the basic concepts related to Organizational Behavior.
2. Think critically and interpret theories related to people and teams within organizational context.
3. Comprehend the utility of Organizational Behavior content for business adjustment to today's environment.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	X	
Adapting to new situations	X

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

Economic Science, like other social sciences, is not constituted within a unified theoretical framework, compared to the natural sciences or mathematics. On the contrary, within the Economic science, different (and as a rule conflictual) theoretical Schools are formed, each of which is constructed with a separate theoretical object and specific system of concepts. The course of Political Economy aims to develop this scientific awareness.

At the end of the course the student should be able to know – at an introductory level – theoretical interpretations on crucial issues such as:

1. The nature of the contemporary economic system.
2. Prices formation and their “substance”.
3. The meaning and origin of profit.
4. The distribution of income.

At the same time, the historical and theoretical roots of modern economic approaches and debates will be illuminated. For example:

- a) the quantity theory of money,
- b) the concept of utility as the determinant factor of prices,
- c) the inherent tendencies of the system toward economic crises.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>

Decision-making	
Working independently	x
Team work	
Working in an international environment	
Working in an interdisciplinary environment	x
Production of new research ideas	
Project planning and management	
Respect for difference and multiculturalism	x
Respect for the natural environment	
Showing social, professional and ethical responsibility and sensitivity to gender issues	x
Criticism and self-criticism	x
Production of free, creative and inductive thinking	x

Others:

2. COURSE CONTENT

The process of the work practice is outlined by the specific program and dures 2 months:
 For the 1st week an acquaintance with all the departments of the host organization is proposed. For the 1st month it is useful the student to work in as many sectors as possible. For the 2nd month a more specialized work in a specific sector is proposed.

3. TEACHING AND LEARNING METHODS - ASSESSMENT

<p>TEACHING METHOD <i>Face-to-face, Distance learning, etc.</i></p>	Face to face		
	Distance learning (asynchronous)		
	Distance learning (synchronous)

21. LEARNING OUTCOMES

Lerning outcomes

Περιγράφονται τα μαθησιακά αποτελέσματα του μαθήματος οι συγκεκριμένες γνώσεις, δεξιότητες και ικανότητες καταλλήλου επιπέδου που θα αποκτήσουν οι φοιτητές μετά την επιτυχή ολοκλήρωση του μαθήματος.

Συμβουλευτείτε το Παράρτημα Α (ξεχωριστό αρχείο στο e-mail)

- Περιγραφή του Επιπέδου των Μαθησιακών Αποτελεσμάτων για κάθε ένα κύκλο σπουδών σύμφωνα με Πλαίσιο Προσόντων του Ευρωπαϊκού Χώρου Ανώτατης Εκπαίδευσης
- Περιγραφικοί Δείκτες Επιπέδων 6, 7 & 8 του Ευρωπαϊκού Πλαισίου Προσόντων Διά Βίου Μάθησης και Παράρτημα Β
- Περιληπτικός Οδηγός συγγραφής Μαθησιακών Αποτελεσμάτων

This course covers the modeling and analysis of business systems using computer simulation. The objective of the course is to introduce students to simulation as a modeling tool with emphasis on understanding the structure of a simulation model and implementing it by means of commercially available software (ARENA). The course also covers the statistical design and analysis of simulation models. These topics include random number generation, input data analysis, statistical

analysis of simulation outputs, variance reduction techniques, and design of simulation experiments. A series of laboratory sessions provide students with hands-on experience of designing and implementing simulation models.

At the end of this course the student should be able to:

1. Design a simulation model for a particular system under examination.
2. Implement the model using commercially available software.
3. Design the experiments required in order to study the system under consideration.
4. Analyze and interpret the results of the simulation.

General Abilities

Λαμβάνοντας υπόψη τις γενικές ικανότητες που πρέπει να έχει αποκτήσει ο πτυχιούχος (όπως αυτές αναγράφονται στο Παράρτημα Διπλώματος και παρατίθενται ακολούθως) σε ποια / ποιες από αυτές αποσκοπεί το μάθημα:

Αναζήτηση, ανάλυση και σύνθεση δεδομένων και πληροφοριών, με τη χρήση και των απαραίτητων τεχνολογιών

Προσαρμογή σε νέες καταστάσεις

Λήψη αποφάσεων

Αυτόνομη εργασία

Ομαδική εργασία

Εργασία σε διεθνές περιβάλλον

Εργασία σε διεπιστημονικό περιβάλλον

Παράγωγή νέων ερευνητικών ιδεών

Σχεδιασμός και διαχείριση έργων

Σεβασμός στη διαφορετικότητα και στην πολυπολιτισμικότητα

Σεβασμός στο φυσικό περιβάλλον

Επίδειξη κοινωνικής, επαγγελματικής και ηθικής υπευθυνότητας και ευαισθησίας σε θέματα φύλου

Άσκηση κριτικής και αυτοκριτικής

Προαγωγή της ελεύθερης, δημιουργικής και επαγωγικής σκέψης

At the end of the course the student will have further developed the following skills/competences:

1. Implementation of models using the **ARENA** package.
2. Statistical analysis of simulation results.
3. Reporting and presenting the results.

22. COURSE CONTENT

1. The concept of simulation
2. Discrete Event Simulation
3. Random Numbers
4. Business simulation
5. Model testing and validation
6. Planning and analysis of simulation output
7. Applications

23. TEACHING AND LEARNING METHODS - ASSESSMENT

<p>TEACHING METHOD Πρόσωπο με πρόσωπο, Εξ αποστάσεως εκπαίδευση κ.λπ.</p>	Lectures and laboratory work face to face.	
<p>USE OF INFORMATION AND COMMUNICATION TECHNOLOGIES Χρήση Τ.Π.Ε. στη Διδασκαλία, στην Εργαστηριακή Εκπαίδευση, στην Επικοινωνία με τους φοιτητές</p>	<p>Use of Information and Communication Technologies (ICTs) (e.g. powerpoint) in teaching. The lectures content of the course for each chapter are uploaded on the e-class platform, in the form of a series of pdf files, from where the students can freely download them using a password which is provided to them at the beginning of the course.</p> <p>Use of specialized Simulation software (ARENA)</p>	
<p>TEACHING ORGANIZATION Περιγράφονται αναλυτικά ο τρόπος και μέθοδοι διδασκαλίας. Διαλέξεις, Σεμινάρια, Εργαστηριακή Άσκηση, Άσκηση Πεδίου, Μελέτη & ανάλυση βιβλιογραφίας, Φροντιστήριο, Πρακτική (Τοποθέτηση), Κλινική Άσκηση, Καλλιτεχνικό</p>	<p>Activity</p>	<p>Semester Workload</p>
	Lectures (2 contact hours per week x 13 weeks)	26
	Laboratories (2 contact hours per week x 13 weeks) – designing and implementing simulation models	26

<p>Εργαστήριο, Διαδραστική διδασκαλία, Εκπαιδευτικές επισκέψεις, Εκπόνηση μελέτης (project), Συγγραφή εργασίας / εργασιών, Καλλιτεχνική δημιουργία, κ.λπ.</p> <p>Αναγράφονται οι ώρες μελέτης του φοιτητή για κάθε μαθησιακή Activity καθώς και οι ώρες μη καθοδηγούμενης μελέτης ώστε ο συνολικός φόρτος εργασίας σε επίπεδο εξαμήνου να αντιστοιχεί στα standards του ECTS</p>	Group assignment related to simulating a realistic system and writing a relevant report	50
	Hours for private study of the student and preparation of home-works	23
	Total number of hours for the Course (25 hours of work-load per ECTS credit)	125 hours (total student work-load)
<p>STUDENT ASSESMENT Περιγραφή της διαδικασίας αξιολόγησης</p> <p>Γλώσσα Αξιολόγησης, Μέθοδοι αξιολόγησης, Διαμορφωτική ή Συμπερασματική, Δοκιμασία Πολλαπλής Επιλογής, Ερωτήσεις Σύντομης Απάντησης, Ερωτήσεις Ανάπτυξης Δοκιμών, Επίλυση Προβλημάτων, Γραπτή Εργασία, Έκθεση / Αναφορά, Προφορική Εξέταση, Δημόσια Παρουσίαση, Εργαστηριακή Εργασία, Κλινική Εξέταση Ασθενούς, Καλλιτεχνική Ερμηνεία, Άλλη / Άλλες</p> <p>Αναφέρονται ρητά προσδιορισμένα κριτήρια αξιολόγησης και εάν και που είναι προσβάσιμα από τους φοιτητές;</p>	<p>I. Final written exam (40%) which includes:</p> <ul style="list-style-type: none"> - Theoretical questions - Practical exercises <p>II. Group project (60%)</p> <ul style="list-style-type: none"> - The group project concerns the design and development of a simulation model describing a realistic system. Students develop the problem gradually, as the required topics are presented in the lectures. <p>In order to submit the group project, students must attend at least 75% of the laboratory sessions.</p>

Others:

2. COURSE CONTENT

This Thesis III is connected to an activity of the host organization of students' Work Practice, which is important for the host organization and needs further analysis or improvement using new methods and/or technologies. The Thesis includes: firstly an overview of proposed solutions in literature, the choice of the most appropriate solutions and possibly the implementation of some of them in the environment of the host organization, during Work Practice.

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of the course is to introduce the necessary mathematical tools to the students of the Department regarding statistics and data analysis.

At the end of this course the student will be able to:

- Performs Analysis of Variance (ANOVA) tests

- Performs Linear Regression
- Performs Multiple Regression
- Performs Nonlinear Regression

It is the second of two compulsory courses in statistics to acquire all the initial tools for basic research in business management subjects.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of the course is to introduce the necessary mathematical tools to the students of the Department regarding statistics and data analysis.

At the end of this course the student will be able to:

- Presents data using descriptive statistics techniques.

- Handles probabilities and random variables (discrete and continuous) .
- Calculates confidence intervals
- Handles hypothesis testing

It is the first of two compulsory courses in statistics to acquire all the initial tools for basic research in business management subjects.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

In this undergraduate course, it is considered that consumers choose, buy, and use products and services, what affects their behavior, and applications in developing marketing strategies. The focus of the course is on the strategic implications of the MCA, the psychological and social influences that the consumer receives during the decision making process. The course provides students with the theoretical knowledge of consumer behavior that they associate with

practical applications in marketing strategy. The role of new communication media, i.e., the Social Media and the Internet are also considered.

At the end of the course the student should be able to understand:

1. The decision-making process and the consumer information processing
2. Consumer perceptions
3. The brand loyalty – types
4. Consumer involvement with the product
5. Measurement and influence of consumers' attitudes
6. Demographics and psychographics of the consumer
7. Consumer behavior research
8. Social and interpersonal influences
9. The influence of occasion
10. Consumer purchasing behavior
11. The role of the Internet and social media in consumer influence and behavior
12. Market segmentation applications
13. Product positioning and communication strategy that appeal to consumers
14. After-purchase consumer behavior (customer satisfaction-product advocacy)

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	
Adapting to new situations	
Decision-making	
Working independently	

Team work	
Working in an international environment	
Working in an interdisciplinary environment	
Production of new research ideas	
Project planning and management	
Respect for difference and multiculturalism	
Respect for the natural environment	
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	
Production of free, creative and inductive thinking	

Others: At the end of the course the student will be able to identify:

- The decision-making process and the processing of information by the consumer
- Consumer perceptions
- The brand loyalty
- Consumer involvement with the product
- Measurement and alterations of attitudes
- Demographics and psychographics of the consumer
- Consumer behavior research
- Social and interpersonal influences
- The effects of occasion
- Purchasing consumer behavior
- The applications of consumer behavior through Social Networks and the Internet
- Market segmentation applications
- Successful Internet and Social Networks strategies that may influence of Consumer Behavior
- Product positioning and communication strategy that appeal to consumers
- After-purchase consumer behavior (customer satisfaction-product advocacy)

2. COURSE CONTENT

1. Basic concepts of consumer behavior
2. Linking consumer behavior and marketing
3. The Relationship of Consumer Behavior with other sciences
4. Basic model of consumer behavior
5. Needs, motives and Motivation
6. Concept, learning models and consumer attitudes - Strategies for affecting consumer attitudes
7. Cultural, social, demographic and consumer behavior - reference groups - opinion leaders
8. Family life cycle
9. Consumer Family Decisions
10. Personality, values, and lifestyle
11. Purchase decision process
12. Types of purchasing decisions
13. Types of purchasing behavior
14. Consumer market segmentation
15. Role of the Internet and Social Networks in the influence of Consumer Behavior
16. Consumer behavior after purchase (customer satisfaction-product advocacy)
17. Consumer safety and protection

1. LEARNING OUTCOMES

Lerning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

At the end of this course the student should be able to formulate:

1. Basic principles of SNA: entities/units of a national economy, their economical relationships (flows / transactions), rationalization and the way flows are recorded in sectoral accounts and the input-output framework, and macroeconomic aggregates and balancing items.

2. The reason and the method that certain fields of social-economic interest are confronted in accordance with the rules of SNA but beyond its central framework. Satellite Analysis and Accounts. Historical background for the documentation of the development of SA, types of SA, the scope of each type, the approach of supply-use analysis in SA. Table-Accounts of satellite analysis.

3. Principles for the development of SA for a certain socio-economic field as a case study, i.e. Tourism SA due to its international progress. Tables-Accounts of TSA.

4. The use of Ontologies to represent the basic concepts of TSA. Exploiting the technologies of OLAP and Balanced Scorecard in representing and accessing Tables-Accounts of TSA. On-Line Analytical Processing (OLAP) provides a multidimensional view of the business operational data to the users, supporting various aggregation levels. Balanced Scorecard translates the vision of an enterprise into a set of interrelated key performance indicators.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	x
Adapting to new situations	
Decision-making

Respect for difference and multiculturalism	
Respect for the natural environment	
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	
Production of free, creative and inductive thinking	

Others:At the end of this course the student will know to document and interpret:

1. Purpose of SNA, its coverage and main items.
2. Fundamentals of SA and the reason of SA development.
3. Fundamentals of TSA and its development approach.

Also, the student will be able to use commercial software for OLAP and Balanced Scorecard in order to analyze data of TSA tables.

2. COURSE CONTENT

1. International and European standards of SNA, i.e. SNA 1993, 2008, ESA 1995
 - Units-Sectors of national economy
 - Establishments, Local kind-of-activity units, Industries, Homogeneous Branches
 - Flows / Transactions
 - Sectoral Accounts
 - Input-Output framework
 - Macroeconomic aggregates and balancing items
 - International-European's Union-National Classifications of Products and Industries
2. SA
 - Development rationalization. Historical background
 - SA Types
 - Functionally Oriented SA (FOSA)
 - Analysis of the use side in FOSA
 - Analysis of products and supply side in FOSA
 - Non-monetary data
 - Tables SA
3. TSA
 - Demand side. Non-monetary statistics
 - Demand side. Monetary statistics
 - Supply side
 - Confrontation of tourism demand and overall supply
 - Employment
 - TSA tables. Rationalization of their sequence
4. XML-RDF
 - Introduction
 - Related Ontologies in the literature
 - Representation of TSA concepts
5. OLAP
 - Introduction to OLAP
 - OLAP functions
 - OLAP application to TSA
6. Balanced Scorecard
 - Introduction
 - Implementation issues
 - Application to TSA

FURTHER OPERATIONAL RESEARCH TECHNIQUES IN DECISION MAKING

COURSE OUTLINE

25. GENERAL

SCHOOL	BUSINESS ADMINISTRATION		
DEPARTMENT	BUSINESS ADMINISTRATION		
LEVEL OF COURSE	UNDERGRADUATE		
COURSE CODE	BA_207	SEMESTER OF STUDIES	SIXTH and EIGHTH
COURSE TITLE	FURTHER OPERATIONAL RESEARCH TECHNIQUES IN DECISION MAKING		
INDEPENDENT TEACHING ACTIVITIES σε περίπτωση που οι πιστωτικές μονάδες απονέμονται σε διακριτά μέρη του μαθήματος π.χ. Διαλέξεις, Εργαστηριακές Ασκήσεις κ.λπ. Αν οι πιστωτικές μονάδες απονέμονται ενιαία για το σύνολο του μαθήματος αναγράψτε τις εβδομαδιαίες ώρες διδασκαλίας και το σύνολο των πιστωτικών μονάδων	TEACHING HOURS PER WEEK	ECTS CREDITS	
Lectures, tutorials and laboratory work	3 (lect.) 1 (tut. or lab.)	5	
Προσθέστε σειρές αν χρειαστεί. Η οργάνωση διδασκαλίας και οι διδακτικές μέθοδοι που χρησιμοποιούνται περιγράφονται αναλυτικά στο 4.			
COURSE TYPE <i>Υποβάθρου, Γενικών Γνώσεων, Επιστημονικής Περιοχής, Ανάπτυξης Δεξιοτήτων</i>	Field of Science		
PREREQUISITE COURSES:	There are no prerequisite courses. It is, however, recommended that students have at least a basic knowledge of Differential and Integral Calculus as well as Statistics and Linear Programming.		
TEACHING AND ASSESSMENT LANGUAGE:	Greek – English, for incoming Erasmus students		
THE COURSE IS OFFERED TO ERASMUS STUDENTS	Yes		
COURSE WEBPAGE (URL)	https://eclass.upatras.gr/courses/BMA417/		

26. LEARNING OUTCOMES

<p>Learning outcomes</p> <p>Περιγράφονται τα μαθησιακά αποτελέσματα του μαθήματος οι συγκεκριμένες γνώσεις, δεξιότητες και ικανότητες καταλλήλου επιπέδου που θα αποκτήσουν οι φοιτητές μετά την επιτυχή ολοκλήρωση του μαθήματος.</p> <p>Συμβουλευτείτε το Παράρτημα Α (ξεχωριστό αρχείο στο e-mail)</p> <ul style="list-style-type: none"> • Περιγραφή του Επιπέδου των Μαθησιακών Αποτελεσμάτων για κάθε ένα κύκλο σπουδών σύμφωνα με Πλαίσιο Προσόντων του Ευρωπαϊκού Χώρου Ανώτατης Εκπαίδευσης • Περιγραφικοί Δείκτες Επιπέδων 6, 7 & 8 του Ευρωπαϊκού Πλαισίου Προσόντων Διά Βίου Μάθησης και Παράρτημα Β • Περιληπτικός Οδηγός συγγραφής Μαθησιακών Αποτελεσμάτων
<p>This course is related to the “Operational Research” course offered in the 5th semester. Its aim is to present additional OR techniques, beyond Linear Programming, for making decisions in complex business environments. In addition, the</p>

course aims to demonstrate that these techniques are related to each other and constitute an integrated methodology for addressing realistic problem situations.

At the end of this course the student should be able to:

1. Formulate and solve by hand simple network analysis problems.
2. Understand the basic concepts of multicriteria analysis.
3. Understand the concepts of queuing theory.
4. Solve simple deterministic and stochastic dynamic programming problems.

General Abilities

Λαμβάνοντας υπόψη τις γενικές ικανότητες που πρέπει να έχει αποκτήσει ο πτυχιούχος (όπως αυτές αναγράφονται στο Παράρτημα Διπλώματος και παρατίθενται ακολούθως) σε ποια / ποιες από αυτές αποσκοπεί το μάθημα:

Αναζήτηση, ανάλυση και σύνθεση δεδομένων και πληροφοριών, με τη χρήση και των απαραίτητων τεχνολογιών

Προσαρμογή σε νέες καταστάσεις

Λήψη αποφάσεων

Αυτόνομη εργασία

Ομαδική εργασία

Εργασία σε διεθνές περιβάλλον

Εργασία σε διεπιστημονικό περιβάλλον

Παράγωγή νέων ερευνητικών ιδεών

Σχεδιασμός και διαχείριση έργων

Σεβασμός στη διαφορετικότητα και στην πολυπολιτισμικότητα

Σεβασμός στο φυσικό περιβάλλον

Επίδειξη κοινωνικής, επαγγελματικής και ηθικής υπευθυνότητας και ευαισθησίας σε θέματα φύλου

Άσκηση κριτικής και αυτοκριτικής

Προαγωγή της ελεύθερης, δημιουργικής και επαγωγικής σκέψης

At the end of the course the student will have further developed the following skills/competences:

1. Solving network problems using relevant software.
2. Solving multicriteria analysis problems using relevant software
3. Formulation of models and solution of problems in queuing theory using Excel.

27. COURSE CONTENT

1. Network analysis (shortest path, maximum flow, min cost flow)
2. Queuing Theory
3. Dynamic Programming
4. Decision Analysis
5. Multicriteria Analysis

28. TEACHING AND LEARNING METHODS - ASSESSMENT

<p>TEACHING METHOD Πρόσωπο με πρόσωπο, Εξ αποστάσεως εκπαίδευση κ.λπ.</p>	Lectures and laboratory work face to face.	
<p>USE OF INFORMATION AND COMMUNICATION TECHNOLOGIES Χρήση Τ.Π.Ε. στη Διδασκαλία, στην Εργαστηριακή Εκπαίδευση, στην Επικοινωνία με τους φοιτητές</p>	<p>Use of Information and Communication Technologies (ICTs) (e.g. powerpoint) in teaching. The lectures content of the course for each chapter are uploaded on the e-class platform, in the form of a series of pdf files, from where the students can freely download them using a password which is provided to them at the beginning of the course.</p> <p>Use of specialized Linear Programming optimization software as well as software for Multi-criteria Analysis</p>	
<p>TEACHING ORGANIZATION Περιγράφονται αναλυτικά ο τρόπος και μέθοδοι διδασκαλίας. Διαλέξεις, Σεμινάρια, Εργαστηριακή Άσκηση, Άσκηση Πεδίου, Μελέτη & ανάλυση βιβλιογραφίας, Φροντιστήριο, Πρακτική</p>	<p>Δραστηριότητα</p> <p>Lectures (3 contact hours per week x 13 weeks)</p>	<p>Φόρτος Εργασίας Εξαμήνου</p> <p>39</p>

<p>(Τοποθέτηση), Κλινική Άσκηση, Καλλιτεχνικό Εργαστήριο, Διαδραστική διδασκαλία, Εκπαιδευτικές επισκέψεις, Εκπόνηση μελέτης (project), Συγγραφή εργασίας / εργασιών, Καλλιτεχνική δημιουργία, κ.λπ.</p> <p>Αναγράφονται οι ώρες μελέτης του φοιτητή για κάθε μαθησιακή δραστηριότητα καθώς και οι ώρες μη καθοδηγούμενης μελέτης ώστε ο συνολικός φόρτος εργασίας σε επίπεδο εξαμήνου να αντιστοιχεί στα standards του ECTS</p>	Tutorials or laboratories (1 contact hour per week x 13 weeks) - solving of representative problems	13
	Assignments	23
	Hours for private study of the student and preparation of home-works	50
	Total number of hours for the Course (25 hours of work-load per ECTS credit)	125 hours (total student work-load)
<p>STUDENT ASSESSEMENT Περιγραφή της διαδικασίας αξιολόγησης</p> <p>Γλώσσα Αξιολόγησης, Μέθοδοι αξιολόγησης, Διαμορφωτική ή Συμπερασματική, Δοκιμασία Πολλαπλής Επιλογής, Ερωτήσεις Σύντομης Απάντησης, Ερωτήσεις Ανάπτυξης Δοκιμίων, Επίλυση Προβλημάτων, Γραπτή Εργασία, Έκθεση / Αναφορά, Προφορική Εξέταση, Δημόσια Παρουσίαση, Εργαστηριακή Εργασία, Κλινική Εξέταση Ασθενούς, Καλλιτεχνική Ερμηνεία, Άλλη / Άλλες</p> <p>Αναφέρονται ρητά προσδιορισμένα κριτήρια αξιολόγησης και εάν και που είναι προσβάσιμα από τους φοιτητές;</p>	<p>I. Final written exam (60%) which includes:</p> <ul style="list-style-type: none"> - Theoretical questions - Practical exercises <p>II. Assignments (40%)</p> <ul style="list-style-type: none"> - The assignments are set at the end of each unit. They involve solving problems and exercises on the material covered in the lectures. <p>The assignments are optional. Students who elect not to submit the assignments are assessed on the basis of the final written exam only.</p>

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of this course is to introduce students to the basic technologies related to the Internet.

The learning outcomes of the course include:

- understanding of the basic principle of the operation of the Internet

- understanding of the syntax and semantics of HTML and CSS
- a basic understanding of JavaScript and its main statements

General Abilities
Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Criticism and self-criticism	
Production of free, creative and inductive thinking	

Others:By the end of this course the student will furthermore be able to understand:

- The contemporary capital market concepts
- The categorisation of financial instruments
- The role of key regulatory Authorities in greek legal system (The Hellenic Capital Market Commission)
- The Stock Exchange listing requirements
- The main issues of the regulatory framework of listed SA companies
- The mechanisms of investors protection
- The fundamental aspects of corporate governance systems as well as the structure of Codes of Corporate Governance

2. COURSE CONTENT

1. Introduction to capital market regulation – History. The financial instruments – categorization. The legal nature and specificities of capital market regulation. The sources- regulation –self- regulatory mechanisms . Key – regulatory authorities. The Hellenic Capital Market Commission .
2. Investment services and protection of investors- conflicts of interest – categorization of investors .
3. Listing rules and regulatory requirements for the admission to trading on a regulated market
4. The regulatory framework of listed companies according to general legal provisions of SA companies- duties of disclosure and transparency requirements.
5. Market abuse- prohibition of abuse of confidential information- mandatory disclosure of confidential information
6. Prospectus- mandatory content- procedure of approval by the Hellenic Capital Market Commission – public offerings
7. Corporate Governance . History- concepts and definitions – the external and internal factors of corporate governance . The regulatory framework of corporate governance in european law – comparative analysis- the self-regulatory nature – soft law. The regulatory framework of corporate governance in greek legal system : composition of board of directors, executive and non-executive members. Commissions regarding compliance systems- risk management and remuneration policies. Codes of corporate governance : regulatory role and structure. The mechanism “comply or explain”. The greek Code of Corporate Governance .

PREREQUISITE COURSES:	There are no Prerequisite Courses: Essentially, the students should possess knowledge on management, financial accounting, financial management included money and capital markets.									
TEACHING AND ASSESSMENT LANGUAGE:	Greek									
THE COURSE IS OFFERED TO ERASMUS STUDENTS										
COURSE WEBPAGE (URL)	https://eclass.upatras.gr/courses/BMA732/									

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The course aims to familiarize the student with the analysis of banking institutions, banking management and financial management in an environment of globalization, rapid change and economic crisis.

The course includes basic concepts and definitions of banking. It also focuses on the structure and purpose of the financial system, the securitization of financial operations, the banking sector structure, the main operations of banking

institutions, the role of banks in the financial system, the traditional mediation and the transformation functions of institutions.

In addition, priority is given to the types of banking institutions such as commercial banks, investment banks, general banks, the balance sheet of banks and the asset and liability management functions.

Moreover, issues such as bank marketing policy, bank clientele, retail and wholesale banking, bank business strategy, and credit policy are analyzed. Emphasis is placed on strategies such as acquisitions & mergers, strategic alliances, and financial groups.

Of particular importance is the banking system in Greece.

The whole analysis is conducted taking into account financial crises and banking risks, in the context of the globalization of money and capital markets.

At the end of the course the student will have further developed the following skills/competences:

1. Knowing how a bank is run,
2. Assessment of the bank balance sheet,
3. Ability to analyze the bank's customers.

At the end of this course the student should be able to:

1. Understands the role of banks in the national economy,
2. Analyzes the competitive banking environment,
3. Identifies the advantages and disadvantages of a banking institution,
4. Evaluates the impact of the crisis on the banking system.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>

1. LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of the course is to develop knowledge and skills relating to the tax and national insurance system as applicable to self-employed individuals, single companies and group of companies. An emphasis will be given to explain and compute the corporation tax liabilities of individual companies and groups of companies

At the end of the course the student will have further developed the following skills/competences:

- Explain the operation and scope of the tax system and the obligations of tax payer and the implications of non-compliance.

- Conduct the appropriate accounting entries relating to corporation tax liabilities

Moreover, at the end of this course the student should be able to:

- Explain and compute the income tax and national insurance liabilities (for both self-employed and companies)

- Explain and compute the effects of value added tax on businesses

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

Search for, analysis and synthesis of data and information, with the use of the necessary technology

Project planning and management

Respect for difference and multiculturalism

Adapting to new situations

Respect for the natural environment

Decision-making

Showing social, professional and ethical responsibility and sensitivity to gender issues

Working independently

Criticism and self-criticism

Team work

Production of free, creative and inductive thinking

Working in an international environment

.....

Working in an interdisciplinary environment

Others...

Production of new research ideas

.....

- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

The aim of the course is to understand the process of management of the firm's resources, including financial decision-making, in order to maximize its value. Business and investment financing decisions, dividend decisions and investment decisions will be analyzed, with ultimate goal the maximization of the market value of the firm and its shareholders. It will present the financing decisions (capital structure of the company in terms of assets and liabilities) and dividend

policy decisions. It will also present the context of the markets for business financing decisions (national and international) as well as the regulatory framework and corporate social responsibility rules.

By the end of this course the student will be able to

- Recognize agency problems in a modern private enterprise and propose solutions based on corporate governance systems.
- Use cash flow discounting tools in asset pricing.
- Calculate the required return of the enterprise under uncertainty.
- Evaluate investment projects.
- Choose the financial structure of the business that maximizes its value.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

Others:By the end of this course the student will, furthermore, have developed the following skills (general abilities):
 1. Calculate the pricing of assets.

2. Estimate the weighted average cost of capital (WACC).
3. Evaluate risk and return of investment programs under uncertainty.
4. Calculate net present value (NPV), internal rate of return (IRR, MIRR), payback period (PBP).
5. Choose the best capital structure.

2. COURSE CONTENT

1. Business Theory and Principles of Corporate Governance (overview of financial management; the financial environment).
2. Time value of money (risk and return; discounted cash flow analysis).
3. Stock and bond valuation (preferred stock; common stock, stock valuation models; bond valuation fundamentals).
4. Capital costs (weighted average cost of capital; cost of equity; cost of debt, valuation of debt and other financial assets; special issues for SMEs financing).
5. Capital investment budget (long term financial planning; capital budgeting; project cash flow analysis; investment decisions; investment appraisal under uncertainty, the effect of inflation and taxation on investment appraisal).
6. Theory of capital structure (capital structure and value creation; capital structure decisions, current asset management -working capital, cash management and inventories-).
7. Dividend policy (theories of investor preferences, signalling effects, dividend reinvestment plants).
8. Management of international risks (interest rate risk, foreign exchange risk, derivatives and risk management; hedging techniques, multinational financial management).

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- *Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area*
- *Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B*
- *Guidelines for writing Learning Outcomes*

The aim of the course is to present the recording of accounting events through the double-entry accounting system. More specifically, students will be introduced into the sources of accounting information, the generally accepted accounting principles, the financial statements such as the balance sheet, the profit & loss statement, the statement of retained earnings, and the cash flow statement, the accounting equation, the bookkeeping process (debits and credits), the double entry book-keeping principles including the maintenance of accounting records, the accounting cycle, the journal, the trial balance, the general ledger, and the different types of accounting reporting standards (e.g., IFRS).

At the end of the course the student will have further developed the following skills/competences:

1. Recognition of accounting events,
2. Recording of accounting events, and
3. Classification of accounting events in the context of the double-entry accounting system.

Moreover, at the end of this course the student should be able to:

1. understand the basic concepts and aims of financial accounting,
2. know the kinds of financial statements,
3. record accounting events,
4. investigate the accounting cycle.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>

1. LEARNING OUTCOMES

Leraning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- *Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area*
- *Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B*
- *Guidelines for writing Learning Outcomes*

The aim of the course is to develop knowledge and understanding of the accounting tasks that take place at the end of the financial year in order to prepare the basic financial statements. More specifically, students will be familiarized with the conceptual and regulatory framework for financial reporting both under the national regulatory framework (Greek Accounting Standards) and IAS framework.

At the end of the course the student will have further developed the following skills/competences:

1. Recognition and measurement of the asset and liabilities / income and expenses
2. Recording transactions and events at the end of the financial year (in a double – entry accounting system)
3. Preparation and interpretation of financial statements for entities and group of companies

Moreover, at the end of this course the student should be able to:

1. understand the principles and concepts of recognition and measurement of assets and liabilities
2. obtain technical proficiency in the use of double entry accounting techniques at the end of financial year related to specific accounting tasks through a step-by-step financial reporting methodology
3. prepare a trial balance record including identifying and correcting errors and recognizing accruals, impairments and provisions respectively.
4. prepare basic and simple consolidated financial statements respectively

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>

FINANCIAL ECONOMETRICS

COURSE OUTLINE

SCHOOL	SCHOOL OF ECONOMICS AND BUSINESS									
DEPARTMENT	BUSINESS ADMINISTRATION									
LEVEL OF COURSE	UNDERGRADUATE									
COURSE CODE	BA_174	SEMESTER OF STUDIES	1 st	2 nd	3 rd	4 th	5 th	6 th	7 th	8 th
									X	
COURSE TITLE	FINANCIAL ECONOMETRICS									
INDEPENDENT TEACHING ACTIVITIES	if credits are awarded for separate components of the course, e.g. lectures, laboratory exercises, etc. If the credits are awarded for the whole of the course, give the weekly teaching hours and the total credits		TEACHING HOURS PER WEEK	ECTS CREDITS						
	Lectures		3	5						
<i>Add rows if necessary. The organisation of teaching and the teaching methods used are described in detail at (d).</i>										
COURSE TYPE	Basic knowledge <i>general background, special background, specialised general knowledge, skills development</i>									
PREREQUISITE COURSES:	There are no Prerequisite Courses: The students should possess knowledge of mathematics, statistics and principles of financial management									
TEACHING AND ASSESSMENT LANGUAGE:	Greek – English, for incoming Erasmus students									
THE COURSE IS OFFERED TO ERASMUS STUDENTS	x									
COURSE WEBPAGE (URL)	https://eclass.upatras.gr/modules/document/?course=BMA528									

1. LEARNING OUTCOMES

<p>Lerning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i> <p>The main aim of the course is to introduce the student to the concept of exemplifying a financial (economic) phenomenon. In addition will provide him with econometric techniques and models that will help him to study and predict economic and financial decisions.</p> <p>At the end of this course the student should be able to:</p>
--

- Exemplify the observed phenomenon.
- Test whether equilibrium models are capable of determining the returns of risk-bearing assets.
- Test economic affairs and provide conclusions about the behavior of the observed phenomenon.

General Abilities

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology	
Adapting to new situations	
Decision-making	
Working independently	
Team work	
Working in an international environment	
Working in an interdisciplinary environment	
Production of new research ideas	
Project planning and management	
Respect for difference and multiculturalism	
Respect for the natural environment	
Showing social, professional and ethical responsibility and sensitivity to gender issues	
Criticism and self-criticism	
Production of free, creative and inductive thinking	

Others: At the end of the course the student will have developed the following skills.

1. Test whether financial markets are effective through econometric models.
2. Test the power of balance models.
3. Evaluate parameters of econometric models, make the necessary statistical tests and decide on their significance.
4. Correct any violations of the model.
5. Use models for prediction.

2. COURSE CONTENT

1. Simple and multiple linear regression.
2. Heteroskedasticity, autocorrelation, multicollinearity.

3. Time series analysis (Box-Jenkins).
4. Stationarity, Integration, Cointegration.
5. Variance models (ARCH-GARCH).
6. Applications in finance using EViews.

3. TEACHING AND LEARNING METHODS - ASSESSMENT

<p>TEACHING METHOD <i>Face-to-face, Distance learning, etc.</i></p>	Face to face	x	
	Distance learning (asynchronous)		
	Distance learning (synchronous)		
	Others:		
<p>USE OF INFORMATION AND COMMUNICATION TECHNOLOGIES <i>Use of ICT in teaching, laboratory education, communication with students</i></p>	Slides	x	
	E-class	x	
	Virtual (simulated) laboratory training		
	Others	EViews	
<p>TEACHING ORGANIZATION <i>The manner and methods of teaching are described in detail.</i></p> <p><i>Lectures, seminars, laboratory practice, fieldwork, study and analysis of bibliography, tutorials, placements, clinical practice, art workshop, interactive teaching, educational visits, project, essay writing, artistic creativity, etc.</i></p> <p><i>The student's study hours for each learning activity are given as well as the hours of non-directed study according to the principles of the ECTS</i></p>	Activity		Semester Workload
	Lectures		26
	Tutorials		
	Laboratory practice		13
	Essay writing		
	Seminars		
	Exercises		26
	Project		
	Study and analysis of bibliography		
	Placements		
	Clinical practice		
	Art workshop		
	Interactive teaching		
	Educational visits		
	Artistic creativity		
	Private study		60
	Others:		
Total number of hours for the Course (25 hours of work-load per ECTS credit)		125 hours (total student work-load)	
<p>STUDENT ASSESSEMENT <i>Description of the evaluation procedure</i></p> <p><i>Language of evaluation, methods of evaluation, summative or conclusive, multiple choice questionnaires, short-answer questions, open-ended questions, problem solving, written work, essay/report, oral examination, public presentation, laboratory work, clinical examination of patient, art interpretation, other</i></p> <p><i>Specifically-defined evaluation criteria are given, and if and where they are accessible to students.</i></p>	Written work, essay/report		
	Problem solving		
	Multiple choice questionnaires		

	Final exam with Multiple choice questionnaires	x	
	Oral examination		
	Clinical examination of patient		
	Mid-term exam (concluding)		
	Final exam with developing questions	x	περιλαμβάνει: - Επίλυση προβλημάτων με χρήση ποσοτικών δεδομένων. - Συγκριτική αξιολόγηση στοιχείων θεωρίας.
	Public presentation		
	Mid-term exam (formative)		
	Laboratory work	x	10%
	Art interpretation		
Others :
